DOUBLE STOCKS
Large Flowering Ten Weeks
One of the richest perfumes comes from these large, double, closely set flowers
(Details on page 28)
Mountain Grown Seeds

Buy them from your Local Dealer
Grocery and Supply Stores over the Intermountain West
Best for the West

The production of "MOUNTAIN GROWN SEEDS" employs the most careful and scientific methods. Only Seeds of the purest strains and of the highest purity and germination will produce the top-quality flowers and vegetables to which "Mountain Grown Seed" planters are accustomed.

Save Shopping Time

It is quicker and safer to buy your seeds in P.W.'s sealed packets and cartons. They protect vitality and prevent mixing of stored seeds. Look for "Ready-Packaged" seeds in your local seed store.
TERMS AND CONDITIONS OF SALE

Our terms are CASH WITH ORDER. C.O.D. orders will be accepted only if accompanied by cash payment of 25% of the amount of the order.

PRICES in this catalog are based on market conditions at the date of publication and are subject to change without notice.

In order to obtain quantity price rates your order must be for a specified quantity of a single variety of seeds, bulbs, or plants.

All items are priced f.o.b. Salt Lake City. The comparatively small weight of smaller than one ounce packets of seed however, need not be considered when listing shipping weights.

Residents of Utah, please add 2% state sales tax.

$1.00 MINIMUM ORDER

Because of proportionately excessive handling cost orders for less than $1.00 will not be accepted unless accompanied by an additional 25c service charge.

GUARANTEE

We GUARANTEE all of our stock (seeds, bulbs, or plants) to be true to name and to reach the customer alive and in good condition. If, on receipt, stock should appear otherwise, or in case of damage, or error, a claim and report must be made within 5 days. We cannot be held responsible for subsequent cultural failures.

Furthermore, we give no warranty, express, or implied, as to the productiveness of any seeds, bulbs or plants we sell and will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of the seeds, bulbs or plants.

If we cannot supply certain items on your order we shall take the liberty, unless directed otherwise, of substituting a similar variety of equal or greater value. If a substitution is unsatisfactory, repack it carefully and return to us at once at our expense.

MAKING OUT THE ORDER

IMPORTANT—CATALOG NUMBERS

It is important that when making out your order, you include the catalog number, name of the article, size or quantity, the price and shipping weight of each article ordered.

Please use the enclosed order blank which folds into a self-addressed envelope. Extras furnished on request.

Fill out the order blank completely and accurately, making sure that your name, address and shipping instructions may be clearly interpreted.

ADDRESS ALL CORRESPONDENCE TO OUR GENERAL OFFICES
PORTER-WALTON CO., P.O. Box 1619, Salt Lake City 11, Utah

TRANSPORTATION

Transportation charges on all classes of merchandise in this catalog must be paid by the purchaser. Shipments weighing over 5 pounds and beyond the 4th zone, and over 20 pounds beyond the 2nd zone, travel cheaper by express. If your order does not specify "Mail, Express or Freight (rail or motor truck)" or does not include postage, we reserve the right to route the shipment according to our best judgment.

SEEDS, NURSERY STOCK AND SEEDLINGS SHIPPED SEPARATELY

Because of the wide variation in the nature, packing and planting time of seeds and nursery stock it is necessary that they go forward in separate shipments. The weight of the separate parts will determine the most economical way to ship, i. e., freight, express or mail. Under such conditions it is difficult to handle C.O.D. orders properly without duplication of C.O.D. Fees.

EXPRESS

Express is one of the most practical methods of shipping plants, roots and trees. The fastest passenger trains carry express shipments. Insurance against damage or loss of parcels valued at $50.00 or less, and special handling of perishable shipments is given at no extra cost. The express company will also deliver your order to you or notify you by telephone or postal card of its arrival. Send no money for express charges. They will be collected when delivery is made.

FREIGHT

For heavy shipments (100 pounds or over) freight is the most economical method of delivery.

Specify rail or motor truck, whichever serves you best. Send no money for freight charges (except where it is necessary shipments go prepaid). They will be collected when delivery is made at destination.

PARCEL POST

Approximate shipping weights are given on items for which no definite packing and postage rate is stated. The following table shows the correct amount of postage to send for a given weight to be mailed to any point within the 4th zone.

PARCEL POST ZONE RATES

When it becomes necessary to make additional explanation or inquiry, please do so on a separate sheet of paper.

How to Send Money. Money is most conveniently and safely sent in the form of a post office money order, express order or check. We will accept personal checks for over $1.00. It is not safe to send silver or currency. Do not send stamps.

See above information regarding C.O.D. orders.

Food For Freedom

You did your part, as one of 20,000,000 wartime Victory Gardeners, to maintain an adequate American standard of living.

Now your Country urges you to produce "Food For Freedom," to release more commercial crops for hungry Europeans.

Freedom from want!!!
Freedom from ill health!!!
Freedom from higher food costs!!!

Mountain Grown Vegetable Seeds

Asparagus Seed

An ounce of seed will sow 75 ft. of row and produce about 250 plants.

Sow the seed in the early spring. When roots are one to two years old, transplant to permanent location. Given care, a bed of 500 sq. ft. provides for an average family for 8 to 10 years.

10 Mary Washington—An early rust-resistant variety that is a heavy producer. The shoots are of a rich dark green with tightly folded tips. Introduced by the U.S.D.A., and surely the best strain grown. Pkt. 10c; oz., 20c; ½ lb., 60c; lb., $1.75; 2-9 lbs., $1.65 per lb.; 10-24 lbs., $1.57 per lb.

12 New Paradise—Produces a normal crop one year earlier. This new sensational variety has been tried and proven by commercial Asparagus growers. Hardy cropper, finest quality, commands top prices.

Pkt., 10c; oz., 40c; ½ lb., $1.25; lb., $3.75.

Dwarf Green Pod Types

1 pkt. plants. 30 ft.; lb. 150 ft.; 60-75 lbs., an acre.

30 P-W's STRINGLESS GREENPOD OR TENDER GREEN—53 days. Our stock of this variety has become so popular with our customers that today it stands out as the leading stringless green pod sort. Pods are 6-6½ in. long, and are absolutely stringless and free from fibre. They are nearly straight, dark-green, and round. Plants are hardy, disease resistant, and dependable croppers. (See color illustration, page 19.)

32 Landreth's Stringless Greenpod (52 days)—Replaces Burpee's Stringless. The pods of this excellent green bean are stringless, fibreless, straight, and 6 to 6½ inches long. There are no indentations in the pods and they hold their deep green color longer. The foliage and growth are similar to Burpee's Stringless Greenpod, but are darker green, more vigorous and more productive.

34 Stringless Black Valentine—49 days. Well adapted for early shipping. Plants large, erect and prolific; attractive oval pods nearly straight, dark green, entirely stringless. It retains its color and texture in shipping a long distance.

Dwarf Wax Podded Beans

Sow same as green pods.

36 Pencil Pod Black Wax—52 days. The best round-podded Wax Bean for the home gardener or market. Extremely productive, bearing magnificent straight, pencil-shaped pods, six to seven inches in length, of a rich golden-yellow color; beautifully rounded, meaty, fresh, brittle, solid and entirely stringless. Our stocks are carefully selected, uniform type, vigorous and productive.

Pole Beans

A packet of these beans will plant 120 feet of row.

40 Blue Lakes—Used extensively by Intermountain and Pacific Coast canners for an asparagus type pack of green beans. Splendid for home use and will command high prices on local markets. Good climber, heavy producer, pods 5½ in. long, ½ in. wide, and almost ½ in. thick. Very fleshy, brittle, and tender.

44 Kentucky Wonder or Homestead—65 days. The pods are thick, meaty and deeply saddle-backed and entirely stringless. The best for all purposes.

All Yellow or Green Pod and Pole beans—
Pkt. 20c; 1 lb., 50c; 2-4 lbs. 45c per lb.; 5-9 lb., 35c per lb.
Add postage at zone rates. See page 4.

Each variety considered as a separate quantity.

LIMA BEANS—Bush and Pole
A pound of Lima Beans will plant 100 ft. of row, about 60 lbs. an acre

56 Early Market Bush—63 days. This new, large, flat-seeded Lima bean offers extra advantages to intermountain growers because of its early maturity and its ability to yield under hot weather conditions. It was introduced as an outstanding variety in 1943 by the U.S.D.A.

58 Fordhook—75 days. Plant is strong and erect; never straight or running. Heavily productive. Pods are borne in clusters of 4 to 8 each. Pods are 4-5 in. long.

Price—Either of above, pkt.; 20c; 1 lb.; 60c; 2-4 lbs.; 55c per lb.; 5-9 lbs., 45c per lb.

BROAD WINDSOR BEANS

50 Long Pod Fava—An improved variety having long pods with 4 to 5 large flat beans which are very good cooked either green or dry. They are very hardy and should be planted as soon as the ground can be worked in the spring.

Pkt. 20c; 1 lb., 40c; 2-4 lbs., 35c per lb.; 5-9 lbs., 30c per lb.

BEETS

An ounce of seed will sow 60 feet of row; a packet, 15 feet; 10 lbs. will plant an acre in rows spaced 14 inches apart.

80 Detroit Dark Red (Perfected Strain)—This beet is one of the most outstanding selections of Detroit Dark Red for dark, uniform, interior color. The roots is globe shaped, slightly flattened at base. Especially adaptable for market gardens and possessing excellent canning qualities. Tops are fairly large.

82 Early Blood (Dark Red Strain)—50-55 days. An extra early variety; splendid for home gardens or markets. Tops medium in size; roots globe shape. Color is very dark red.

85 GREEN TOP BUNCHING—50-55 days) An early beet with medium size, erect, grayish green tops and clean, fresh looking foliage. The roots, 2½ to 3 inches in diameter, are round, smooth, glossy, and extremely attractive, selling readily in the markets. The flesh is bright blood red, of finer texture and with less fiber than most bunching beets.

Beet Prices—Pkt., 10c; oz., 20c; ½ lb., 50c; lb., $1.50; 2-9 lbs., $1.40 per lb.; 10-24 lbs., $1.32 per lb.

MANGELS (Stock Feed Beets)

87 Giant Half Sugar Rose—
89 Giant Sludstrup—

Price of Mangels—lb., $1.00; 2-9 lbs., 95c per lb.; 10-24 lbs., 90c per lb.; 25-99 lbs., 85c per lb.; 100 lbs., $60.00.

FASTER BUNCHING WITH TWIST-EMS'

Just a twist of the wrist secures vegetables or flowers in bunches. Millions used commercially.

Utility Twist-EMS are put up in convenient bundles of 250 pieces ready to use.

CARROTS

An ounce will sow 300 ft. of row; a packet, 60 feet; 2 to 4 lbs., an acre.

112 CHANTENAY RED CORED—70 days. The flesh and core are reddish-orange, fine grained, and tender.

Pkt., 10c; oz., 20c; 1/4 lb., 60c; 1b., $1.80; 2-9 lbs., $1.65 per lb.; 10-24 lbs., $1.60 per lb.

124 NANTES (Coreless)—68 days

Very attractive, 6-7 in. long, smooth, cylindrical, and stump-rooted. They are entirely coreless and exceptionally fine quality.

Pkt., 10c; oz., 25c; 1/4 lb., 75c; 1b., $2.25; 2-9 lbs., $2.15 per lb.; 10-24 lbs., $2.05 per lb.

128 DANVERS RED CORED—An improved strain with superior dark red interior color. Outside is smoother, brighter and more attractive.

Pkt., 10c; oz., 20c; 1/4 lb., 60c; 1b., $1.80; 2-9 lbs., $1.65 per lb.; 10-24 lbs., $1.60 per lb.

126 Imperator—77 days. The carrots are often eight inches long, smooth, somewhat tapering, and deep orange in color.

Pkt., 10c; oz., 20c; 1/4 lb., 60c; 1b., $1.80; 2-9 lbs., $1.65 per lb.; 10-24 lbs., $1.60 per lb.

132 Improved Long Orange—Roots scarlet orange. Heavy cropper.

Pkt., 10c; oz., 20c; 1/4 lb., 60c; 1b., $1.80; 2-9 lbs., $1.65 per lb.; 10-24 lbs., $1.60 per lb.

134 Mastodon or Short White—Most productive for stock feeding.

Pkt., 10c; oz., 20c; 1/4 lb., 60c; 1b., $1.80; 2-9 lbs., $1.65 per lb.; 10-24 lbs., $1.60 per lb.

CHINESE CABBAGE

117 Chihili—The most popular of any of the Chinese types and very dependable in heading. The heads are 18 to 20 inches long, compact, and pointed at the top. Especially delicious as a salad.

Pkt., 10c; oz., 20c; 1/4 lb., 60c; 1b., $1.80; 2-9 lbs., $1.75 per lb.; 10-24 lbs., $1.60 per lb.
CAULIFLOWER

An ounce of seed will produce 1,500 to 2,000 plants in open ground or about 3,000 in frames.

140 P.-W.'s Perfection (Super Snowball)—65 days. It is adapted for either early or late Fall use. It possesses all the good qualities of the best Early Snowball strains. The leaves are longer and enfold closely over the heads. The inner leaves almost cover the snow-white heads, bleaching them nicely. Pkt., 10c; ¼ oz., $1.50; oz., $2.75; ½ lb., $9.00; 1 lb., $27.50.

142 New Snowdrift—Also known as "White Mountain" and "Improved Holland Erfurt," which our tests show are merely other names for this splendid variety. This strain will produce a more satisfactory yield under extreme weather conditions than any other Snowball strain we know. The heads are somewhat larger than the old type Snowball, and it matures with more evenness. Pkt., 10c; ½ oz., $1.50; oz., $2.75; ¼ lb., $9.00; lb., $27.50.

CAULIFLOWER PLANTS

6020 P.-W.'s Perfection (Super Snowball) will be ready after April 15th.

UTAH CELERY—Famous from Coast to Coast

One ounce, 1,500 plants; half-pound to transplant an acre.

150 P.-W.’s Improved Utah—125 days. The far-famed Utah Celery is grown in such demand. Developed by the local gardeners. Its superior qualities give it exclusive control of the local celery market. It has double the amount of heart of any celery. The plant is of close habit, and blanches to a creamy white. Ribs perfectly solid and crisp. Our true strain produces the most uniform, large, compact plants of any stocks produced in Utah. Pkt., 10c; ¼ oz., 50c; oz., $1.50; ¼ lb., $5.00; lb., $15.00.

Harvesting the famous Utah Celery on one of Utah’s many productive fields.

Snowdrift Cauliflower

CELERIAC—Turnip Rooted Celery

156 Giant Smooth Prague—This really delicious vegetable should be in every home garden. The bulbs when cut into cubes, boiled and served with a cream sauce are delicious. Pkt., 10c; oz., 65c; ¼ lb., $2.25; lb., $6.50.

CHICORY

160 Asparagus or Radichetta—Fast growing annual; grown for tops which are used for greens; tender flower shoots also used.

162 Large Rooted or Coffee—The roots, when dried, are used as a coffee substitute. The young leaves may be used in salad. Sow seeds early in spring in rows about 2 feet apart. Roots grow 12-14 inches long and 2 inches thick at top, tapered.

Either of above—Pkt., 10c; oz., 35c; ¼ lb., $1.15; lb., $3.50.

CHICORY PLANTS

6030 CELERY PLANTS

P.-W.’s Improved Utah—Transplanted plants, sturdy and well rooted. Set out from May 15th to last of June. Harvest in September and October.

Plants in flats: Express shipment—Average 85 per flat, $1.75 per flat. 30 lbs. per flat.

It’s easy to grow fresh crisp celery the modern way:

EASILY GROWN

NO HILLING

NO TYING

It is not necessary to “hill up” celery plants to produce stalks of excellent quality. By spacing the plants about six inches apart in the rows, with about eighteen inches between the rows, celery will grow in moderately compact bunches.

More Vitamin A—Richer Flavor:

Under this method of culture the outer stalks of celery retain much of their natural green color and are a good source of vitamin A. The “heart” blanches itself to a clean white and is remarkably crisp and delicious.
SWEET CORN

One pound will plant about 400 hills; a packet, 100 hills; 12 lbs., an acre.

PLANT HYBRID CORN

GREATER PRODUCTIVITY
GREATER DROUGHT AND PEST RESISTANCE—

HYBRID VARIETIES

170 MARCROSS C6.13—Early Hybrid. The 5-foot stalks produce 8 inch, 10 to 14-rowed, golden yellow ears well filled to the tip in 74 to 77 days. As both parents are highly disease resistant, Marcross C6.13 is doubly protected against disease. Usually over 85 per cent of the ears are marketable.

176 IOANA—Large Eared—Midseason—Wilt Resistant Hybrid—86 days. The ears are large, slightly tapering mostly 8 to 9 inches long, with 12 to 14 rows of creamy yellow, medium deep kernels, which fill the ear well to the tip. These ears are of fine quality, sweet and tender.

174 GOLDEN CROSS BANTAM—93-95 days. The most prolific of the yellow sweet corn; produces at least 40% more good marketable ears than ordinary stocks. The plant is sturdy, with broad, dark green leaves.

194 LINCOLN—83 days. Winner of the All American Bronze Medal in 1942. The vigorous well foliaged plants have proved to be even more productive than Golden Cross Bantam. Lincoln is exceptionally drought resistant as well as markedly resistant to pests and disease.

175 EVERBEARING BLEND—A single planting produces edible ears over a period of 4 to 5 weeks. Especially blended for home gardeners, this is a mechanical mixture of four or more proven 12 row hybrids of different maturity dates. It has all the advantages of hybrid vigor and quality.

Prices—All Hybrid Sweet Corn—pkt., 20c; 1 lb., 55c; 2-4 lbs., 50c per lb.; 5-9 lbs., 40c per lb.

OPEN-POLLINATED

VARIETIES

180 Golden Bantam (True 8-row stock)—72 days. Eight rows of even, broad, fairly deep golden kernels of most delicious flavor.

182 Improved Bantam—67 days. Fine for garden and market.

184 Golden or Bantam Evergreen (Also called Golden Rod) 89 days. Plants, 6-7 ft. high; ears 8-10 inches in length filled with 12-14 rows of medium width kernels, tender and of excellent flavor.

186 Golden Sunshine—65 days. The ears are medium long and plump, 7-8 in. and 10-12 rows of fine quality corn.

188 Stowell’s Evergreen—98 days. The best known late white variety. The ears about 7-8 inches long, 14-20 rowed.

Prices—All open-pollinated Corns—pkt., 20c; 1 lb., 35c; 2-4 lbs., 30c per lb.; 5-9 lbs., 25c per lb.

GROW WORM-FREE CORN

Kill Corn Ear Worms
Kill European Corn Borer

Spray or dust the plants every 10 days during late May and June being careful to cover the under side of the foliage. When the silk begins to grow, apply Pest-B-Gon dust at 2 to 3 day intervals for more complete control of the corn earworm.

3293 PEST-B-GON DUST 10% DDT
10 oz. Duster, 69c; 2 lb., pkg., $1.00.

3275 PEST-B-GON SPRAY 20% DDT
4 oz., 65c; 16 oz., $2.00.
207 MARKETER—A splendid new early variety producing very dark green cylindrical fruits which taper slightly at the ends. The fruits are from 7½ to 8 inches long, and 2½ inches in diameter. The flesh is crisp, and icy-white in color. Tests have shown it to be one of the most prolific varieties in existence, and its uniform shape and attractive color make it an excellent market variety.

Pkt., 10c; oz., 30c; ¼ lb, 90c; lb., $2.75.

202 Boston Pickling—Very productive, extensively grown for pickles. Very smooth and symmetrical—flesh crisp and tender. It continues to be the most popular for home use.

Pkt. 10c; oz., 20c; ¼ lb, 70c; lb., $2.10.

203 COLORADO—60 days. The finest slicing cucumber. Beautiful, long, slender, dark green fruits, 9-12 in. long, that bring the highest prices on the critical markets. Popular because of its fine shape and intense color, which is maintained longer than that of most varieties. A heavy yielder.

Pkt., 10c; oz., 30c; ¼ lb, 90c; 1 lb, $2.75.

204 Cubit—This winner of the 1944 All-American Selections Bronze Medal, is a dark green white spine, cylindrical cucumber with rounded ends. Its handsome appearance and firm white flesh are retained for a long time after picking. It is a prolific bearer, producing more and better fruits for early picking.

Pkt., 10c; oz., 30c; ¼ lb, 90c; lb., $2.75.

206 Improved Long Green—62 days. Very vigorous and productive. Fruits long, uniformly slender, beautiful dark green. The stock we offer is second to none.

Prices—Pkt., 10c; oz., 25c; ¼ lb, 80c; lb., $2.40.
**LETUCE**

An ounce of seed will sow 250 ft. of row; about 2 lbs. an acre.

273 IMPERIAL NO. 456 (Cornell)—A splendid new selection of the Imperial type developed by the United States Department of Agriculture and Cornell Experiment Station. It has proved very sure heading, and is particularly adapted for growing on muck soils. The frame and head are slightly smaller than Great Lakes and of a lighter green color. It is resistant to tip burn and early bolting.

- Pkt., 10c; 1/2 oz., 35c; oz., 50c; 1/4 lb., $1.65; lb., $5.00; 2-9 lbs., $4.75 per lb., 10-24 lbs., $4.50 per lb.

272 GREAT LAKES—A really superior lettuce, winning top place in the All-American Selections for 1944. Being very resistant to tip burn, able to withstand heat and sun, and remarkably slow to throw a seed head. Great Lakes is already the most popular summer lettuce. The heads are large, crisp and very attractive.

- Pkt. 10c; 1/2 oz., 35c; oz., 50c; 1/4 lb., $1.65; lb., $5.00; 2-9 lbs., $4.75 per lb.; 10-24 lbs., $4.50 per lb.

274 Imperial No. 847—This new Imperial strain is especially fine for late Spring and Summer growing. It is a black seeded variety that shows a remarkable resistance to heat. Large, firm heads, dark green, and of high quality.

- Pkt. 10c; 1/2 oz., 35c; oz., 50c; 1/4 lb., $1.10; lb., $3.20; 2-9 lbs., $3.05 per lb., 10-24 lbs., $2.90 per lb.

276 Imperial No. 44—Surest Heading “Iceberg” Lettuce—This new lettuce has proved to be the outstanding “Iceberg” lettuce to grow. It is the variety which does best on a wide range of soils, both upland and muck, especially on muck. Not only does it head better than any other strain, but has shown definite resistance to tip burn.

- Pkt., 10c; 1/2 oz., 20c; oz., 35c; 1/4 lb., $1.10; lb., $3.20; 2-9 lbs., $3.05 per lb., 10-24 lbs., $2.90 per lb.

280 P.W.’s New York No. 12—77 days. A single plant selection from the regular New York or Los Angeles market strain. It is early, makes large, solid heads, uniform in maturing.

- Pkt. 10c; 1/2 oz., 20c; oz., 35c; 1/4 lb., $1.10; lb., $3.20; 2-9 lbs., $3.05 per lb., 10-24 lbs., $2.90 per lb.

**LOOSE LEAF LETTUCE**

286 Early Curled Simpson—45 days. A popular early sort, forming a large, loose head.

288 Prizehead—47 days. Large, loose headed sort; leaves tinged with brown, very heavy.

Prices on each of above—Pkt., 5c; oz., 20 c; 1/4 lb., 70c; lb., $2.00.

ORDERS ACCEPTED NOW FOR IMMEDIATE SHIPMENT

Shipments Must Be Completed
During January and February

SEED AND NURSERY SPECIALISTS 11
MUSKMELONS OR CANTALOUPES

A packet of seed will plant about 15 hills; an ounce, 75 hills; 2½ lbs., an acre.

302 HALES BEST NO. 36—85 days. Size 5½ x 5½", weight about 3 lbs. Shape, slightly oval and very uniform. Desirable for any purpose, home, garden, roadside stands, and shipping. Flesh, pink, very thick, richly flavored.

310 HALES BEST NO. 936—87 days. This is the Jumbo. It serves well those who desire a large melon of this type.

304 Resistant No. 45 (Also called "Imperial No. 45" and "H. B. No. 45")—86 days. Size 6 x 5½", weight about 4 lbs. It is not only resistant to powdery mildew and the ideal shipping melon, but it is rapidly becoming a leader everywhere. Seed cavity is small, flesh thick and deep colored, delicious flavor. The fact that the seed cannot be jarred loose and remains edible and really better 10 days after picking, makes it a most desirable shipper.

306 Honey Dew (Gold Rind, Green Flesh)—110 days. Excellent for roadside stands because of attractive color. Very popular because of its honey-like flavor. Fruits are round, about 7 in. in diameter, smooth and hard, suitable for long-distance shipping. Excellent keepers. The thick, green flesh is sweet and tender.

308 Hearts of Gold Improved—88 days. A fine shipping melon as well as general purpose. Medium size, round, and well netted. Flesh orange-yellow, excellent flavor, firm, and holds up well.

CASABA MELONS

300 Golden Beauty—105 days. Most popular of the Casabas. It is a bright golden color and deeply wrinkled skin when mature. The flesh is creamy white, sweet and spicy.

Prices on all of above Muskmelons and Casabas—

Pkt., 10c; oz., 25c; ¼ lb., 80c; lb., $2.40; 2-9 lbs., $2.25 per lb.; 10-24 lbs., $2.15 per lb.

WATERMELONS

A packet of seed will plant about 8 hills; an ounce, 25 to 30 hills; 2 to 3 lbs. will plant an acre.

OKRA or GUMBO

A packet of seed will grow 15 ft. of row; an ounce, 50 ft.

340 Dwarf Green—50 days. Early dwarf growing variety with dark green pods. Its early maturity and good quality make it popular with market growers.

342 Clemson Spineless—55 days. An improved Perkins long-podded type. Awarded All-American silver medal in 1939. A very uniform spineless strain; straight pods rich green.

Price of above—Pkt., 10c; oz., 15c; ¼ lb., 35c;

328 STRIPED KLONDIKE No. 11—90 days. A new selection of the attractive and universally popular shipping melon which carries the highest sugar content of any commercial variety. The rind is thin, but strong; the flesh is solid and a bright red. Average weight is 30 lbs., slightly larger than the parent strain.

Pkt., 10c; oz., 25c; ¼ lb., 75c; lb., $2.25; 2-9 lbs., $2.15 per lb.; 10-24 lbs., $2.05 per lb.

322 Kleckley Sweet No. 6 (Wilt Resistant)—88 days. A selected type which has proven almost fully resistant to wilt. Slightly smaller than "Improved Kleckley Sweet," but otherwise identical.

Pkt., 10c; oz., 20c; ¼ lb., 55c; 1 lb., $1.65.

332 King and Queen (Winter) 85 days. An excellent shipper. Flesh is sweet and of fine texture. When properly stored, they remain edible for several months. The color is light cream with faint irregular green stripes. Seeds are quite small and very black.

Pkt., 10c; oz., 20c; ¼ lb., 70c; 1 lb., $2.00; 2-9 lbs., $1.90 per lb.; 10-24 lbs., $1.80 per lb.

Green Klondike
A packet of seed will sow about 25 feet of row; half ounce, 100 feet; 3 to 6 lbs., an acre.

352 SWEET SPANISH (Utah Strain Certified) Hundreds of carloads of sweet Spanish Onions are dispatched from Utah districts every season. The importance of onions as a major Utah crop necessitates great care in the selection of a superior strain. Today "Utah Strain" is universally acclaimed for its excellence. Its superiority lies in its deep yellow color, large size, trueness to type, and fine keeping qualities. Only packages of one pound or more will bear the certification seal.

Per lb., $7.50.

350 SWEET SPANISH—not certified: packet, 10c; ½ oz., 35c; 1 oz., 50c; ½ lb., $1.65; 1 lb., $3.00; 2 to 9 lbs., $4.75 per lb.; 10 to 24 lbs., $4.50 per lb.

358 Crystal White Wax—Very large white onion of the Bermuda type. The sweet, mild flavor and large size make it a ready seller on any market. Our stock of this variety is imported from the finest stock available.

Pkt., 10c; ½ oz., 25c; oz., 40c; ¼ lb., $1.25; lb., $3.75; 2-9 lbs., $3.60 per lb.; 10-24 lbs., $3.50 per lb.

360 Southport White Globe—A fine white onion. The bulbs are round, medium large, solid, and pure white. The flesh is waxy, fine grained, and mild. Keeps well in fall storage. For large market growers, it always commands the highest prices.

Pkt., 10c; ½ oz., 30c; oz., 50c; ¼ lb., $1.50; lb., $4.50; 2-9 lbs., $4.35 per lb.; 10-24 lbs., $4.20 per lb.

362 P.W.'s White Sweet Spanish—Similar in shape, size, and habits of growth to P.W.'s Sweet Spanish Onion. It has a beautiful white skin which makes it a desirable onion for market. The flavor is unusually sweet and mild. A fairly heavy yielder and the bulbs sell for the top market prices.

Pkt., 10c; ½ oz., 40c; oz., 65c; ¼ lb., $2.00; lb., $6.00; 2-9 lbs., $5.75 per lb.; 10-24 lbs., $5.25 per lb.

366 Barletta—The best extra early small variety for pickling and green bunching. Bulbs are small, flat, pure white. of mild, sweet flavor. Sow about 50 lbs., per acre.

Pkt., 10c; ½ oz., 35c; oz., 50c; ¼ lb., $1.35; lb., $4.00; 2-9 lbs., $3.90 per lb.; 10-24 lbs., $3.75 per lb.

373 WHITE LISBON—Grown almost exclusively as an early bunching onion. It is round with a thick neck and tender white flesh. If allowed to mature the round bulbs will reach almost three inches in diameter.

Pkt., 10c; ½ oz., 25c; oz., 35c; ¼ lb., $1.20; lb., $3.50; 2-9 lbs., $3.25 per lb.; 10-24 lbs., $3.00 per lb.

372 White Portugal or Silverskin—An all purpose variety used in great quantity. Excellent for sets, pickling, green bunching, or for storage. A dependable cropper.

Pkt., 10c; ½ oz., 25c; oz., 40c; ¼ lb., $1.35; lb., $4.00; 2-9 lbs., $3.90 per lb.; 10-24 lbs., $3.75 per lb.

ONION SETS

A quart (1 lb.) will set 75 to 100 feet of row.

Onions grown from sets mature 3 to 4 weeks earlier than those grown from seed.

376 Yellow Sets
378 White Sets

1 lb., 35c; 2-9 lbs., 30c per lb.; 10-24 lbs., 27c per lb.
If by mail add postage at zone rate.

ONION THRIPS

DDT MOST EFFECTIVE CONTROL

3290 Dura Dust No. 50 for mixed water spray.
1 lb. pkg., 90c; 4 lb. bag, $2.25; 40 lb. bag, $21.50.

SEED AND NURSERY SPECIALISTS 13
382 Bliss Everbearing—76 days. Popular home garden sort. Vines, 30 in. tall; dark green, thrifty, of long bearing period. Pods, 3 in. long, blunt.

386 Giant Stride (Wilt resistant) 75 days. This is the largest podded variety of commercial importance. Especially adapted for the market gardener and shipper. The vine grows 28 to 30 inches tall with large dark green foliage and heavy stem. The pods are 3 in. long, dark green and plump, containing 8 to 10 large tender peas. Giant Stride is an excellent variety for cold storage use.

390 Laxton's Progress—63 days. Produces the largest pods of any of the early dwarf varieties. Popular for long-distance shipping, also for home and market gardeners. We offer a very superior strain of this leading variety. Ordinarily two pickings will clean the vines. Vines, 18 in. tall; pods, 4 in. long, containing 7-9 large, tender peas.

392 Little Marvel—62 days. An outstanding early dwarf pea for home gardens. Vines 18 in. tall, vigorous, and heavily laden with pods 3 in. long, blunt. They are very attractive peas and are esteemed for their high table quality. The peas are fairly large at table stage.

396 Stratagem—80 days. Fine late variety for home gardens, market growers, long-distance shippers. 24 in. vines; 4 in. in pods; color, dark green. A very fine variety and a heavy yielder.

Each of above, pkt., 20c; 1 lb., 40c; 2-4 lbs., 35c per lb; 5-9 lbs., 30c per lb.

NOTE: Prices are quoted on the basis of the quantity of each variety ordered.

GROW BETTER LEGUME CROPS

The NITRAGIN 10c Garden Size Inoculator—good for any amount up to eight pounds of Garden Peas, Sweet Peas, Lupines, Garden Beans, Lima Beans and Soybean Seeds— is packed in a special scientific metal foil lined can.

Catalog Number 4140

10c each

14 PORTER-WALTON CO.
Parsley

1 oz. 150 feet of row. 3 to 4 lbs. per acre.

402 Champion Moss Curled—A vigorous compact sort. Deep green color and attractive foliage. One of the best for market or home use.

406 Hamburg (Rooted)—Fleshy roots resembling parsnips. Flesh, white. Roots may be dug and carried through winter like turnips. 100 days.

Prices, either of above—Pkt., 5c; oz., 15c; ¼ lb., 45c; lb., $1.25; 2-9 lbs., $1.20 per lb.

Parsnips

1 oz. for 100 feet. 3 to 6 lbs. per acre.

408 Ideal Hollow Crown—Our strain of Hollow Crown is the thick shouldered type particularly fine, smooth and regular.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.10; 2 to 9 lbs., $1.00 per lb.

411 New Harris White Model—This is considered by all market gardeners who have tried it, an improvement over the Hollow Crown. It is of medium length, smooth, and pure creamy white. The absence of side roots and the ease with which it is harvested are important points in its favor.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.10; 2 to 9 lbs., $1.00 per lb.

Pumpkins

1 oz. 20 hills; 3 lbs. per acre.

412 Connecticut Field (Big Tom)—Large orange colored fruits, flat on the ends with smooth, hard rind. For canning or pies, also used largely for stock feed.

Pkt., 5c; oz., 20c; ¼ lb., 55c; lb., $1.65; 2 to 9 lbs., $1.55 per lb.; 10 to 24 lbs., $1.50 per lb.

418 Sugar Pie Pumpkin—A handsome and productive small pumpkin, ten to twelve inches in diameter; flat-round, skin orange. Flesh deep yellow of fine grain and very sweet.

Pkt., 5c; oz., 20c; ¼ lb., 55c; lb., $1.65; 2 to 9 lbs., $1.55 per lb.; 10 to 24 lbs., $1.50 per lb.

Transplantone

Reduces Loss in Transplanting

419 Most plants stop growing for a time if they are moved or transplanted. Transplantone is formulated to supply the plant with the chemicals which stimulate root formation and growth at this vital period. It is not a fertilizer.

½ oz., 25c; 3 oz., $1.00; lb., $4.00.

Shipping Weights

Although all stock in this catalog is priced f.o.b. Salt Lake City, the weight of vegetable seeds in packets and ounce size need not be considered with shipping weights for postage. Include weights for postage on each item of ½ pound or more.

PEPPERS

1 oz. per 1,000 plants

420 California Wonder XXX Strain—Has all the qualities desired in a stuffing pepper. Grows 4 inches in length and ¾ inches in diameter. A fine, sweet and tender pepper with very thick walls. Smooth, glossy, green fruits, changing to crimson when ripe. The most uniform and highest quality strain.

Pkt., 10c; ½ oz., 55c; oz., 95c; ¼ lb., $3.25; lb., $9.50.

428 Anaheim Chili—A hot late variety, popular because of its agreeable pungency. Fruits are 6-8 inches long, 1 inch wide, tapered.

Pkt., 10c; ½ oz., 45c; oz., 75c; ¼ lb., $2.25; lb., $6.75.

430 Long Red Cayenne—Strong and pungent; fruits about 5 inches long and ¾ inch thick.

Pkt., 10c; ½ oz., 45c; oz., 75c; ¼ lb., $2.25; lb., $6.75.

436 Red Chili—Small, bright red, hot and pungent. About 2 inches long and ¾ inch thick.

Pkt., 10c; ½ oz., 45c; oz., 75c; ¼ lb., $2.25; lb., $6.75.

PEPPER PLANTS

6060 California Wonder XXX

Plants in flats

Approximately 85 per flat—Express or Truck Shipment.

$1.75 per flat

30 lbs. per flat
POTATOES
10 lbs., 100 feet of row—800-1,000 lbs. per acre.

Seed Potatoes
440 Bliss Triumph—Early. Tubers nearly round, smooth, reddish-punk, with shallow eyes. They yield enormous crops.
442 Idaho Russet—The best baking potato. Its pearl white, dry and mealy flesh cannot be surpassed. Late maturing.
444 Irish Cobbler—The leading early, round, white potato. Potato prices are subject to market changes. Write for quotation.

Imp. Semesan Bel
— Controls seed-borne Rhizoconia and scab. 2 oz. will rear 6 to 8 bushels.
Prices—2 oz. pkg., 35c; 1 lb., $1.83; 4 lbs., $6.33.

RADISHES
1 oz., 50 feet of row—3-4 lbs. per acre.

455 Cavalier—Because of its medium top growth in hot weather, Cavalier is the best of the Scarlet Globe types for summer plantings. It matures quickly with uniform, olive shaped roots of brilliant scarlet. Cavalier is very early and a valuable radish for greenhouse forcing. Flesh crisp and firm.

RHUBARB OR PIE PLANT
7007 Victoria Roots—25c each; 3 to 9, 17c ea.; 10 to 29, 12c each; 30 to 100, 10c each.
7009 MacDonald Red—This variety is now generally considered the best red Rhubarb obtainable. The stalks are very large and bright crimson in color. They are tender, of excellent flavor and when cooked they make a delicious deep pink sauce. Propagated only from divisions.
Strong Roots, 65c each; 3 to 9, 60c each; 10 to 29, 58c each; 30 to 100, 52c each.
Shipping weight—1½ lbs. each.

SAGE
480 S. Oficinalis—An indispensable perennial much in demand for seasoning.
Pkt., 10c; ½ oz., 55c; oz., 95c; ¼ lb., $3.25
6070 One year plants—45c each; 3 to 9, 42c each; 10 to 29, 40c each; 30 to 100, 36c each.
Shipping weight—½ lb. each.

SALSIFY
Cultivate the same as carrots. Can remain in the ground all winter for early spring use.
486 Mammoth Sandwich Island—Grows to a very large size and resembles a good-sized parsnip. Mild and delicately flavored.
Pkt., 10c; oz., 55c; ¼ lb., $1.85; lb., $5.50.

P.W.'s Mountain Grown Potatoes
452 P.W.'s Sparkler—The radishes are round, brilliant scarlet with white bottoms. Ready for the table in 20 days from planting. Its color gives an appetizing appearance.
454 Crimson Giant—29 days (Long standing)—This is the largest of the early radishes. It is deep crimson in color with white flesh of unexcelled quality.
456 French Breakfast—24 days. A splendid variety, medium-sized, olive-shaped, very crisp and tender; scarlet color with white tip.
458 Early Scarlet Globe (Medium Top)—It is preferred for general outdoor culture where a good top is desired for bunching. Rich scarlet color; tender, mild flavor. Bred for uniformity of slightly oval globes. Crisp white flesh of splendid quality.
460 Icicle—Pure white, slender, and tapering in shape. The flesh is crisp, and of splendid flavor. 27 days.
Radish Prices—Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 95c; 2 to 9 lbs., 90c per lb.; 10 to 24 lbs., 85c per lb.; 25 to 99 lbs., 80c per lb.; 100 lbs. $75.00.

Winter Varieties
Seed for winter radishes should be sown about the first of August. For winter use, the roots should be pulled and packed in damp sand stored in a cool cellar.
466 Celestial or White Chinese—Pure white, firm.
Price—Pkt., 3 c; oz., 15c; ¼ lb., 45c; lb., $1.25.

Rhubarb, MacDonald Red

16 PORTER-WALTON CO.
SPINACH

1/4 lb. seed will sow 200 ft.;
12 to 20 lbs., an acre.

490 Bloomsdale Long Standing Improved—(Savoy-leaved). We offer a wonderfully well-bred strain. Large, deep green, well crumpled leaves which produce enormous crops and stand a long time without bolting to seed. Highly recommended to spinach growers who demand only the finest.

Prices—Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 70c; 2 to 9 lbs., 65c per lb.; 10 to 24 lbs., 60c per lb.; 25 to 99 lbs., 58c per lb.; 100 lbs. $55.00.

SQUASH

Summer Squash

1/4 lb. of seed will plant about 100 hills;
5 to 6 lbs. of seed an acre.

502 Early Prolific Straightneck—The fruits are very uniform for shape and size and the skin is a clear, bright yellow color, with no trace of green even when young. Small vine growth allows thick planting. They are usable when only 4 to 5 in. long and until 12 to 14 in. long.

504 Cocomelle Bush—Is long and cylindrical. Dark green when young, and fine flavored. Bush vines.

506 Early White Bush—Fruits are rather small, quite flat, with scalloped edges. They are produced in amazing quantities, and if kept picked will bear until frost. Snow-white at all times.

510 Early Yellow Summer Crookneck—Fruits heavily warted and golden yellow in color. We have a beautiful pure line strain.

512 Zucchini Black—Replacing Cocomelle. Fruits long and slender, showing a black green color when young. We believe they have a better flavor.

Price, each of above—Pkt., 10c; oz., 20c; 1/4 lb., 55c; lb., $1.65; 2 to 9 lbs., $1.55 per lb.; 10 to 24 lbs., $1.50 per lb.

SWISS CHARD

1/4 lb. of seed will sow 250 ft. of row;
10 lbs., an acre.

496 Fordhook Giant—The rich dark green leaves are very crinkled, thick, and quite tender, making excellent boiling greens. The wide, pearly-white stems are deli-
cious if prepared like Asparagus. The appealing dark green color makes Fordhook the leading variety. Pkt., 10c; oz., 15c; 1/4 lb., 45c; lb., $1.25; 2 to 9 lbs., $1.15 per lb.; 10 to 24 lbs., $1.05 per lb.

498 RHUBARB CHARD—A valuable novelty, with dark green crumpled leaves above bright crimson stalks. Very attractive in appearance and excellent in flavor. Pkt., 10c; oz., 25c; 1/4 lb., 70c; lb., $2.00; 2 to 9 lbs., $1.90 per lb.

KILL SQUASH BUGS
SURELY — EASILY

Sabadilla dust kills both young and adult bugs.

Does not retard plant growth.

313 SABADILLA DUST 1 lb.,
55c; 3 lbs., $1.35; 50 lbs., $12.50.

Although all stock in this catalog is priced f.o.b. Salt Lake City, the weight of vegetable seeds in packets and ounce size need not be considered with shipping weights for postage.
TOMATOES
The Pride of Your Garden and Table

An ounce of seed will produce about 2,000 plants. Approximate number of days from setting plants to ripened fruits are indicated.

530 P.-W.'s EARLY CANNER—The fruits are smooth, very red, and not susceptible to cracks. Vines are compact in habit, allowing three plants in the space ordinarily required for two. Many years have been spent in tests and selection, to combine the virtues which make it an outstanding variety for all gardeners. 70 days.

Pkt., 10c; ½ oz., 60c; oz., 95c; ¼ lb., $3.25; lb., $9.50.

536 Earliana Special—We earnestly believe our strain is the finest of this first early type. Fruits are medium size, flattened globe-shape, deep scarlet-red, firm and smooth. 66 days.

Pkt., 10c; ½ oz., 50c; oz., 80c; ¼ lb., $2.75; lb., $8.00.

540 Stokesdale—An excellent medium early tomato, ripening in season of John Baer and adapted for market and canning. The fruit is medium size, deep globe shape, very solid and of fine quality. The vines are very prolific.

Pkt., 10c; ½ oz., 35c; oz., 60c; ¼ lb., $2.00; lb., $6.00.

542 Stone (Improved)—Enormous yielder. Valuable for the market gardener, trucker, and canner. Bright deep scarlet fruits; large and flat, but deep; smooth and solid. 86 days.

Pkt., 10c; ½ oz., 35c; oz., 55c; ¼ lb., $1.85; lb., $5.50.

536 Huckleberry (Wonderberry)—The fruit is as large as grape and jet black when ripe. Makes delicious pies, jellies, jams, etc. Pkt., 10c; ½ oz., 65c; oz., $1.10.

P.-W.'s STURDY TOMATO PLANTS

For many years we have made a specialty of growing tomato plants. Our plants are transplanted into flats, scientifically grown, sturdy and well hardened; and are far superior to plants taken directly from the seed bed or greenhouse to the field.

6080 P.-W.'s Early Canner 6088 Imp. Stone
6082 Earliana 6086 Stokesdale

Ready from about May 1 to June 25th.

TURNIPS

It requires 1 to 1½ lbs. of seed per acre in drills. An ounce will sow 300 feet of row.

560 Purple. Top White Globe (Special Strain)—This fine stock produces the world's finest turnips. Large, smooth, and delicious flavored. The color is snow white with a rich purple top; the flesh is firm, fine-grained and tender. It is the standard home, market, garden and shipping variety and always sells at advanced prices over ordinary sorts.

Pkt., 10c; oz., 15c; ¼ lb., 30c; lb., 75c; 2-9 lbs., 70c per lb.; 10-24 lbs., 60c per lb.

RUTABAGA OR SWEDISH TURNIP

570 American Purple Top—Remarkable for uniform shape and fine quality; a splendid keeper. Skin smooth; a beautiful yellow color, fine-grained, very sweet and tender.

Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., $1.00; 2-9 lbs., 95c per lb.; 10-24 lbs., 85c per lb.

TENDERGREEN BEAN

Our stock of this variety has become so popular with our customers that today it stands out as the leading stringless greenpod sort. Maturing in 53 days, the pods are dark green, stringless and free from fiber. Tendergreen is a dependable cropper for home or commercial gardens.

See Page 5

107

CABBAGE GREEN ACRE

Green Acre is a superior, new, early cabbage. It is about 5 days later than Golden Acre but has larger heads and attractive deep green color.

See Page 7

310

MUSKMELON
HALES BEST 936

Our most popular home garden melon. This strain of the important shipping and market melon, "Hales Best 36", produces larger fruits which are highly prized by the home gardener. The flesh is thick, deep orange and has a delicious spicy flavor.

See Page 12

170

MARCROSS C613 – Hybrid Sweet Corn

Best of the early hybrid sweet corns, Marcross C613 is endowed with high productivity, uniformity and a most delicious flavor.

See Page 9

458

SCARLET GLOBE
(Early) RADISH

Early Scarlet Globe Radish is preferred by home and commercial gardeners alike because of its uniform size and rich color, crisp tender flesh and medium top growth which permits easy bunching.

See Page 16
Annual Flower Novelties

Exciting new flowers for your 1948 garden

No. 1262
Marigold
MAMMOTH MUM

Largest of the Chrysanthemum-flowered Marigolds. The 30-inch plants produce long stemmed flowers of clear light yellow, with many narrow incurved petals. Excellent garden or cut flower.

Pkt. 25c

Cosmos Radiance

Cosmos Radiance is a brand new and different variety. Its distinct zoned center and rich colors set it apart from any other Cosmos you have ever seen. The petal color is deep rose and the zone, not merely a deeper rose, but a true rich crimson. The flowers of Radiance are impressively larger than those of other Sensation varieties. Its habit is neat, compact, and erect; characteristically its own.

After dark, under artificial light Radiance is at its best. Assuming a glowing velvety richness it proves its value as a cut flower. The stems are long; it flowers excellently when cut in the bud and has exceptional lasting qualities. Higest rated in the All America trials for 1948 it was awarded the Silver Medal, missing the possible Gold Medal award by only a few points.

Pkt. 25c

Asters
Princess Mixed

Last year this charming new Aster made a “hit” with thousands of western gardeners. The crested centered flowers of clear rich colors make a pleasing effect in the garden and when cut. Neat, compact plants with abundant foliage and excellent branching hold their flowers erectly in a natural bouquet. Wilt resistant, early blooming.

Pkt. 25c
TO GET THE MOST FROM YOUR GARDEN

Study the code letters accompanying each family or variety name and the key on page 77 to gain many cultural tips which will enable you to grow a greater variety of flowers with added success. It takes only a minute to find when and where to plant and also the general use of any flower.

The plants of the Nanum strain are neat, compact and upright and produce simultaneously 10 to 16 well proportioned flower spikes. Because of their medium low, sturdy habit and the fact that they require no staking, they are exclusively recommended for garden beds and borders. As cut flowers also, their straight strong stems make the Nanum Grandiflorum particularly useful for medium or low arrangements. Cutting the blooms encourages growth of new spikes, keeping the beds in flower all season.

**MAXIMUM SNAPDRAGONS (30-36")**

Tallest of the Snapdragon family this strain is preferred where long stems and large flowers are required.

940 Blend of Maximum Super Giants—Not a random mixture, but a studied combination of harmonizing colors in their various shades and tints.

Price: Each of above, pkt. 25c.

---

**For Quick Growth...**

**... Early and Continuous Blooming**

The quick easy and dependable means to your last minute Beautification Project

**Semi Dwarf Snapdragons**

Nanum Grandiflorum

(16-20")  ajrFGN

This year we offer for the first time four new colors. These are clear lively shades which will brighten your flower borders and make lovely bouquets for indoors.

927 DAINTY—Numerous spikes of soft pink flowers.

929 HARMONY—Aptly named for its harmonious combination of terra cotta and yellow with shades of rose.

931 RED ROCKET—Bright gleaming red. Blooms consistently on strong base branched stems.

933 ROSE SENSATION—A lovely shade of rich rose pink. One of the most popular garden colors.

947 SUPER MAJESTIC MIXTURE—Hundreds of shades and color combinations make this one of the most interesting blends imaginable. A bed of Super Majestic Snapdragons will keep your garden and home beautiful all summer.

Each of above, Pkt. 25c.

---

**Tetra Snapdragons**

This new race of Giant Snapdragons has met with great favor among garden hobbyists all over the country. The exceptionally large flowers are prettily ruffled, produced in larger spikes on 30 inch stems. Base branching in habit, the giant spikes are all long-stemmed. Wonderful for cutting. Pkt. 25c.
Annuals Make Summer’s Greatest Show

Use them throughout the garden for showy beds, cut flower rows and low neat edgings

Improved
Giant Double Calendulas  aksBDGN
Calendulas are among the easiest of all annual flowers to grow and also one of the most useful for garden beds or for cutting. They begin blooming when quite young, and if kept picked will flower until frost.

1012 CHRYSANtha or SUNSHINE (18")—Large beautifully formed flowers of overlapping petals, in an arrangement resembling Chrysanthemums. Its color of rich warm buttercup-yellow is a favorite for producing brighter garden effects.
Pkt., 10c; 1/4 oz., 35c.
1016 ORANGE KING—A glowing orange with incurved center petals.
Pkt., 10c; 1/4 oz., 25c.
1018 DOUBLE GIANT MIXED—All colors.
Pkt., 5c; 1/4 oz., 20c.
Small Successive Plantings in the Cutting Garden Provide "Loads" of Blossoms All Summer

No. 1122 COSMOS SENSATION (Radiance)
(See full color illustration on Page 20.)

Yes, Cosmos Radiance is really new. Not a mere refinement of color or form but an entirely new combination of two new colors. Even novice gardeners can recognize it by its distinct central zone which was inherited from one of its parents; a bicolor species from India.

Radiance is an all round flower. Its impressively large flowers of deep rose and rich crimson are beautiful in the garden. It has good long stems, strong enough to arrange easily and the colors, under artificial light, become even more glowing and velvety in appearance. Cosmos Radiance won the Silver Medal of All-America Selections by a wide margin over its nearest contender.

Pkt., 25c; 1/16 oz., 60c.

COSMOS ajstFHN

Giant Early Flowering Sensation (5'-6')—The unusual size (3-4" diameter) of the Sensation Group and its new individual colors are putting Cosmos "Back on the Map" in many gardens.

1114 Dazzler—Rich, deep crimson.
1118 Pink—Sparkling rose pink.
1120 White—Pure and glistening.
1124 Mixed Colors—Many beautiful shades.

Price of Sensation varieties: Pkt., 10c; 1/2 oz., 25c.

1106 Early Double Cosmos (5')—Smaller than the sensation type, but of very pleasing form.

Pkt., 10c; 1/16 oz., 40c.

CYNOGLOSSUM (Chinese Forget-Me-Not)

Pkt., 10c; 1/4 oz., 30c.

DIANTHUS (Garden Pinks)

1132 Best Single Mixed ajstBN (10")—Garden Pinks.

Pkt., 10c; 1/2 oz., 25c.

FOUR O'CLOCKS

1148 Four O'Clocks (Mirabilis) (2') ajstFH—Showy plants that do well everywhere. Flowers open in the afternoon except on cloudy days when they bloom all day. Mixed colors.

GODETIA (12") ajstFII

People who live in higher valleys where the summers are not too hot will find these showy flowers unexcelled.

1158 Dwarf Single Mixed.

Pkt., 10c; 1/2 oz., 35c.

Gypsophila Covent Garden

GOURDS (8') akEHU

Large Gourd fruits make attractive decorations at harvest festivals. The small ones may be placed in bowls for table decorations. Bird houses, dippers, bowls, and toys are made of others.

1160 Small Varieties Mixed—Pkt., 5c; 1/2 oz., 20c.

1164 All Varieties, Mixed—Pkt., 5c; 1/2 oz., 20c.

THE NEW KING LARKSPURS akrsFCH

The new King Larkspurs are the last word in this important floral family. In size, in richness and clarity of color, and in abundance of flowers they have not been equaled. Together with the Giant Imperial strain they complete a fine color assortment.

1194 CARMINE KING—Carmine
1202 BLUE SPIRE—Blue
1204 LILAC KING—Lilac
1206 LOS ANGELES—Salmon
1208 ROSE KING—Rose
1210 WHITE KING—White
1218 GIANT IMPERIAL MIXED—These and other beautiful shades.

Price—Each of above, Pkt., 10c; 1/2 oz., 35c; 1/4 oz., 55c.
Annual Flowers for Cutting are Easily Grown
In the Borders of the Vegetable Garden

HELICHRYSUM akrCHN
1170 Strawflower (24")—Mixed, all colors.
   Pkt., 10c; ½ oz., 45c.

LOBELIA akuFKS
1224 Crystal Palace Compacta (6") — Rich, deep blue, dark foliage.
   Pkt., 10c; 1/32 oz., 45c.

MARIGOLD ajstFKH

1266 Gypsy Jewels
   Gypsy Jewels Mixture is an exceptionally fine
dwarf growing form of
the popular Gigantea
type. The plants grow
only 12 to 18 inches tall,
but produce many sweet
scented flowers which are
as large as 4 to 4½ inches
in diameter. They are
near, compact and very
free flowering, ideal for
low beds. The colors
range widely through the
brilliant shades of orange,
yellow and primrose.
   Pkt., 10c; ½ oz., 25c.

1262 MAMMOTH MUM (30") — (See full color illustration on page 20)
   In the All-America flower trials for 1944 Mammoth Mum won the 2nd
   award. It is the largest of the "Mum" flowered Marigolds. The long
   sturdy stems make them exceptionally fine for cutting. Made up of many
   finely cut and intertwined florets, the blooms are fluffy and ball-like in
   appearance. Soft, pleasing sulphur yellow.
   Pkt., 25c; 1/16 oz., 60c.

1256 All Double Orange (48")—Splendid large orange flowers of the
   improved African type.

1260 All Double Lemon (48")—A clear attractive lemon yellow of large
   size.
   Either of above: Pkt., 10c; ½ oz., 45c.

GLEAM HYBRID NASTURTIUMS (12") akuFHR
   Double flowers and sweet fragrance go far toward making this group
   one of the most used annuals. Their habit is also neat and compact and
   the flowers are long stemmed.

1324 Golden Gleam—A blaze of golden yellow.
1328 Scarlet Gleam—Fiery orange-scarlet.
1332 Gleam Hybrids—A gorgeous color array.
   Any of above: Pkt., 10c; oz., 35c; ½ lb., $1.00; lb., $3.00.

SINGLE NASTURTIUMS
1310 Best Tall Single Mixed (24").
   Pkt., 5c; oz., 35c.
1314 Best Dwarf Single Mixed (12").
   Pkt., 10c; oz., 35c.
   Quantity prices: ½ lb., $1.00; lb., $3.00.

NICOTIANA
   The flowers open toward evening and emit a fragrant perfume.
1370 Affinis Choice Mixed (2").
   Pkt., 10c; ½ oz., 35c.

MORNING GLORIES
1298 Heavenly Blue. The purest, richest sky
   blue shading to soft creamy white in the
   throat. It blooms very early and continues
   until frost.
   Pkt., 10c; ¼ oz., 30c.
1294 Pearly Gates—A grand early flowering
   pure white. It companions Heavenly Blue in
   its nature of growth, size and quantity of
   bloom.
   Pkt., 10c; ½ oz., 35c.
1300 Tall Mixed—All colors.
   Pkt., 5c; ½ oz., 20c.
1291 CRIMSON RAMBLER — The best red
   Morning Glory for planting with Heavenly
   Blue and Pearly Gates. The color is a strik-
   ing ruby red emphasized by an attractive
   white throat and tube; a really pleasing ef-
   fect.
   Pkt., 10c; ½ oz., 20c.

Morning Glory Crimson Rambler

SEED AND NURSERY SPECIALISTS 25
PANSIES (5"")

  Pkt., 50c; 1/32 oz., $1.75.
1392 Rocky Mountain Giants—A fine Swiss strain grown in our own Rocky Mountains. It has been outstanding in our trials for balance of colors and large size of blooms.
  Pkt., 50c; 1/16 oz., $1.25.

6500 PANSY PLANTS — Giant flowering plants carefully grown from the world’s finest strains. Price 75c per doz. Plants ordered by mail will be wrapped in 1/2 dozens. Add 15c per dozen for postage and packing. Express shipments will be packed 12 plants per basket (4 baskets per case) $5.00 per 100.

---

ALL DOUBLE PETUNIAS
1447 (Mixed)
We are happy to again offer to our customers a good Double Petunia. This new strain has fully double and daintily fringed flowers, 2½ to 3 inches in diameter. The colors include many lovely shades and combinations of rose, pink, purple, white and cream. The luxuriant effect of these fine Double Petunias is equaled by no other flower of as easy culture.
  125 seeds, $1.25; 500 seeds, $3.50.

---

PETUNIAS  

GIAN T FLOWERING FRINGED TYPE
1422 Dwarf Giants of California (Ramona Strain)—Dwarf fringed and fringed, with open, well-marked throats.
  Pkt., 50c.
1426 Ruffled Monsters—Giant flowers with large throat and exquisitely fringed edges; many bewitching shades and colors.
  Pkt., 50c.
1427 Theodosia (20")—A distinctive variety with large fringed flowers of rich rose-pink with a clearly defined golden center. Its size, form and pleasing color contrast are reason enough for its wide popularity.
  Pkt., 50c.

GIAN T FLOWERING SINGLE
1430 Elk’s Pride (Improved Purple Prince)—Largest, darkest, and best velvety purple.
  Pkt., 50c; 1/64 oz., $2.50.

1429 SNOWSTORM IMPROVED
The most beautiful of all white Petunias. A shadow of yellow in the throat adds extra richness to the glistening white of the large 4- to 5-inch blooms.
  Pkt., 50c.

SINGLE BEDDING TYPES
For continuous profusion of bloom, vivid coloring, and ease of culture, this class of Petunia is unsurpassed. The newest varieties are of more dwarf habit, very neat and compact.
1432 Celestial Rose (12-15")—A beautiful rich satiny rose.
  Pkt., 25c; 1/32 oz., 45c.
1438 Blue Bedder (12-18")—Dwarf free flowering.
  Pkt., 25c; 1/32 oz., 45c.
1433 GLOW (10-12")—An All American Silver Medal Winner. The most vivid red dwarf Petunia. The plants are dwarf and bushy; and are covered with 2½ inch flowers of dazzling carmine red.
  Pkt., 25c; 1/32 oz., 60c.
1442 Snow Queen (12-15")—Compact, pure satin white.
  Pkt., 25c; 1/32 oz., 45c.
1444 TOPAZ QUEEN (12-15")—A scarlet rose of unusual depth that does not fade. Its habit is uniformly compact and its flowers are larger than the average of this type.
  Pkt., 25c; 1/32 oz., 60c.
1436 Hybrida Mixture (18-24")—Unending variety of color.
  Pkt., 10c; 1/16 oz., 40c.

Mix small seeds such as Petunias with fine sand before sowing. The seeds will have more space to grow into sturdy plants.

26 PORTER-WALTON CO.
P.-W.'s Giant Sweet Peas

Summer Flowering Spencers (72"")

We offer the very choicest and most distinctive varieties, each one in its respective color is sure to give entire satisfaction.

1580 Bonnie Briar—A sparkling rose pink of immense size.
1582 Capri—Wonderful light blue, with long stems. A fine, vigorous grower, and most desirable in every respect.
1588 Flora—Clear deep lavender self.
1590 Golden Dragon—Large blooms, with blended shades of bright orange, and soft orange rose.
1592 Loch Lomond—Mahogany.
1594 Maytime—Rich golden cerise with large flowers and long stems.

1598 Rubicund—A crimson scarlet, vigorous in growth.
1600 Snow White—Immense blooms of solid paper white.
1604 Welcome—A really magnificent dazzling scarlet. A vigorous grower with excellent stems.
1610 P.-W.'s Silver Medal, Blend—The finest assortment of Giant Spencers obtainable at any price. A formula mixture containing 75 named varieties, including the latest novelties.

Any of above: Pkt., 10c; ½ oz., 25c; oz., 45c; ¼ lb., $1.25; lb., $3.50.

Early Flowering Spencers (72"")

This new type is in great demand for forcing under glass and for outdoor culture, coming into flower five or six weeks earlier than the summer flowering type. If flowers are kept picked, will continue to bloom over a period of nearly four months.

1550 Bacchus—Mammoth rich red maroon on long firm stems.
1552 Bridesmaid—Deep silvery pink with stems unusually long. Large flowered.
1556 Fragrance—Large clear lavender, ruffled and fragrant.
1558 Hope Improved—Mammoth flowers of pure white. One of the most pleasingly formed of all Sweet Peas.
1560 Iris Blue—A strong growing deep "Iris Blue."
1564 Sequoia—Enormous flowers of rich golden cerise. A standard of comparison.
1566 Sterling—Large salmon rose on strong stems.
1568 Susanna—Carmine Red.
1570 Treasure Island—A sparkling golden orange; very large.
1572 P.-W.'s Early Flowering Spencer, Best Mixed—The above and many other varieties properly blended for a harmonious color effect.

Price—Any of above:
Pkt., 15c; ½ oz., 45c; oz., 80c; ¼ lb., $2.50, lb. $7.50.

4937 TRAIN-ETTS

New Weatherized TRELLIS NETTING Ideal Support for SWEET PEAS, GARDEN PEAS, POLE BEANS, CUCUMBERS, TOMATOES

Grows finer, larger flowers and vegetables. Hung with ease in 5 minutes; no fuss or bother. Use instead of string or wire. (Wire in sun burns delicate tendrils.) Doesn't rot like string—lasts several seasons. In 3 sizes: No. 1, 60x72 in. 65c; No. 2, 66x96 in. 85c; No. 3, 60x150 in. $1.55.

Sweet Pea Hope Improved

SEED AND NURSERY SPECIALISTS 27
PHLOX DRUMMONDI aks FKN
1462 ALL COLORS MIXED (15") The bushy, half spreading plants are excellent for bedding and low informal borders. They bloom in large heads of clear, bright colored flowers. Pkt., 10c; 1/16 oz., 40c.

POPPIES aks
1470 American Legion—Lovely, single, bright orange-scarlet with maloese cross.
1472 Shirley, All-DoublMixture—Re-selected all-double blooms with the full range of colors found in both old and new.
1474 Shirley, Single Mixed—Satiny flowers of various colors. All Annual Poppies: Pkt., 10c; 1/4 oz., 30c; oz., 80c.

PORTULACA (4’)
1480 P.-W.’s Large Flowering Single Mixed Pkt., 10c; 1/16 oz., 25c.
1490 P.-W.’s Double Mixture—Pkt., 10c; 1/32 oz., 35c.

RICINUS ajsHHS
1500 Castor Bean (Zanzibariensis Mixed) (10’)—The ornamental leaves beautifully lobed are 2 1/2 to 4 feet across. Each plant makes a perfect pyramid of foliage. Pkt., 5c; oz., 35c.

SALVIA aksDLP
1520 America or Globe of Fire (18")—The most uniform in habit and the most continuous bloomer of all Salvias, America is the best for border plantings. Its color is striking vivid scarlet. Pkt., 50c.
1521 BLAZE OF FIRE (14-16")—Smaller and more compact than America. The outstanding characteristic of Blaze of Fire is its extra early blooming habit. The plants are strong, robust and floriferous; the flower spikes brilliant red. Pkt., 50c.

Salpiglossis (30’’) ajsCG
Most attractive; should be in every garden. Each flower is veined with a glint of gold.

1504 Emperor Finest Mixed — Large improved strain, complete range of colors. Pkt., 10c; 1/8 oz., 30c.

Salpiglossis Mixed

SCABIOSA ajsFL
1540 P.-W.’s Giant Hybrids—Includes all the new and rare colors. An unrivaled mixture. Pkt., 10c; 1/8 oz., 25c.

STOCKS aksBH
1620 IMPROVED 10 WEEK, MIXED (12’’) (Illustrated in full color on the front cover) —This beautiful and fragrant flower is deserving of still wider planting in the home gardens. Give them a place in well drained soil where summer heat is broken for part of the day, and never let them get dry. Their reward to you will be generously surprising. Pkt., 25c; 1/4 oz., 55c.

VERBENAS
1652 Giant Hybrids Mixed (12’’) aksFHS—A magnificent strain of Verbena; robust, free blooming. It has more flowers to each truss. The florets are large and the colors carefully blended. Pkt., 10c; 1/16 oz., 40c.

The Gorgeous Zinnia aksFH

GIANT DAHLIA — FLOWERED (36’)
The flowers often measure 4 inches in depth and 4-6 inches across and are abundantly produced. They are most desirable of all the large double Zinnias. 1680 Canary Bird—primrose yellow.

1682 Crimson Monarch—flaming crimson.
1684 Dream—deep lavender blue.
1686 Exquisite—light rose with center deep rose.
1690 Polar Bear—white.
1692 Will Rogers—lovely brilliant scarlet red.
1696 Giant Dahlia Flowered—gold medal mixed. Price each of above: Pkt., 10c; 1/8 oz., 35c; 1/4 oz., 55c; 1 oz., $1.65.

ZINNIA LILIPUT (18’’) (below)

(Zinnia Flowered Zinnia—Cont’d)

DAHLIA FLOWERED ZINNIA (Continued)

1712 CHOICE MIXTURE—The plants are symmetrical, attractive little bushes supporting innumerable miniature double flowers. The colors cover a wide range from lilac thru red, salmon and yellow, to white. They are very desirable for cut flower arrangements. Pkt., 10c; 1/8 oz., 25c; 1/4 oz., 45c; 1 oz., $1.35.
These exceptional, improved flowers are the finest that the plant breeding specialists have produced. They are “tops” in beauty, color and charm.

PHLOX AFRICA

This popular phlox is a consistent performer, hardy, vigorous and healthy. Its rich green foliage lends character and power to the brilliant dark red blooms. Same price as July Lilies.

Columbine
MRS. SCOTT ELLIOTS HYBRIDS

Many beautiful shades of blue, white, lavender, red, yellow and pink with exceptionally long spurs characterize this fine strain. We offer husky field grown plants that will bloom the first season after planting. For seeds see page 32.
Plants: Each 40c; 3 to 9 @ 35c each

DELPHINIUM PACIFIC HYBRID GIANTS

6724 Round Table Series — Each year new crosses and blends are added to this already most complete range of Delphiniums. The florets are large, making long, beautiful flower spikes. For seeds see page 33.
Plants: 45c each; 3 to 9 plants @ 40c each
Here is a perennial plant that answers the long-felt need for a permanent, always neat edging. Its grey, practically evergreen, foliage forms a solid cushion-like mound from the first Spring day until snow conceals it again for Winter. During early summer it is covered with the daintiest of brilliant rose flowers with slender 4-inch stems and spicy fragrance. The foliage of Rose Cushion grows only 3 to 4 inches tall and 6 to 8 inches wide.

Plants, 55c each; 3 to 9 @ 50c each; 10 to 29 @ 45c each; 30 to 100 @ 40c each

**Dianthus Rose Cushion**

Catalog No. 6746

**Chrysanthemums**

Best of all Fall flowers for garden beauty or for cutting

6590 GROUP OFFER
One each of these excellent Chrysanthemums
4 STRONG PLANTS
Shipping Weight 3 lbs.

6690 (Left)
EARLY BRONZE
(POMPON)
First of the Pompon Chrysanthemums to bloom, Early Bronze is our most popular pompon "Mum" because it makes such fine bouquets. The flowers, of rich bronze shades, are produced in compact sprays on strong stems.
Plants, 45c each; 3 to 9 @ 40c each

6672 (Left)
POHATCONG
(GOLD STANDARD)
Plants, 45c each; 3 to 9 @ 40c each

6662 (Left)
GOLD STANDARD
The deepest, richest gold you have ever seen, in a fully double flower of broad incurved petals. When disbudded it may be grown to 6 or 7 inches across. Blooms in late September.
Plants, 55c each; 3 to 9 @ 50c each

6654 (Right)
RED VELVET
This sparkling new introduction is a master stroke for glorified garden effect as well as for fine cut flowers. A velvety crimson when opening, it turns to a darker, richer and more lasting crimson upon maturity. The healthy plants are covered with heavy, attractive foliage. Perhaps the best of all crimsons.
Plants, 55c each; 3 to 9 @ 50c each
Never Before Such Fine

Garden Chrysanthemums

New and Popular dksuDS

Disbudding down to 8 to 12 blooms to the plant will produce flowers of exceptional exhibition quality which will open a week or more earlier than normal. Even without disbudding, however, you will have the best garden Chrysanthemums you have ever grown.

6662 GOLD STANDARD—A large double bloom with broad incurved petals of very deepest shade of yellow. It does not fade in the rain or sun. It will produce prize winning blooms up to 7 inches across, when disbudded, or very nice flowers without disbudding. An early variety. (See illustration on opposite page.)

6680 LAVENDER LADY—A lovely new double flower of true lavender with no trace of mauve, purple or magenta. It is an unusually clean cut and distinct specimen, in full bloom in early October. The beautiful 3 inch blooms are perfectly spaced on branching sprays. (Med. height.)

6679 MATADOR—Large globe shaped blooms made up of many perfectly incurved petals. Attractive lavender pink. Fully double. Late October.

6673 MRS. PATTIE—Terra cotta red with gold reverse. A large deep flower with incurved petals. The very earliest variety.

6654 RED VELVET—Finest red. See color illustration on opposite page.

6656 SANDY RICHIE—A very lovely and prized variety. The petals are deep crimson with shades of gold on the reverse. A strong plant that blooms in mid October.

6658 White Lady—Without question White Lady is one of the finest white Chrysanthemums for the garden. It has shades of primrose in the center that lend a distinct richness to its character. The extra large flowers are of excellent form.

Prices: See line "B" at bottom of page.

Proven Early Bloomers

In these selections of early blooming Chrysanthemums you will find a variety of types and colors. Each of them is hardy and dependable and worthy of a place in your garden.

6664 Ember (36") October 15—A brilliant glowing bronze combining shades of coral and orange. Very beautiful double flowers and the most hardy of our entire list.

6676 Mme. Chiang Kai-Shek—Plant Patent No. 634—Beautifully formed flowers, fully double, composed of stiff petals. The color is a blending of chrome-yellow, cadmium-yellow, and soft tinted old gold which under bright sun or artificial light shows a delicate undertone of rose. Plant spreads to about 2 feet, and is about 2 to 2½ feet tall. In full flower in September.

Each, $1.00; 3 to 9 @ 90c each; 10 up @ 70c each.

6681 NORMANDY (24-30")—Lovely, delicate pink, deeper in the center, with soft suffusion of coral. The large high centered flowers blooming in early October make wonderful bouquets.

6672 Pohatcong (30") October 10—Medium dwarf compact grower. Blooms profusely in a very pleasing shade of rosy lavender. (See opposite page.)

Prices: See line "A" in table at right.

White Lady

BUTTON OR POMPON

CHRYSANTHEMUMS dksuDS

Pompom Chrysanthemums are unusually effective in the garden, and the flower clusters are particularly useful for table and room decoration. Plants grow 24 to 30 inches tall and bloom profusely.

6690 Early Bronze—Sept. 25—Light bronze, flecked yellow. (See opposite page.)

6694 Jewel—October 15—Deep rose.

6696 Judith Anderson—October 15—Yellow, shaded orange in center.

**COREOPSIS (24") cisFJN**

1900 Sunburst—Highly prized in cut flower decorations for their long graceful stems and exceptionally long keeping quality. One of the few perennials that will bloom continuously when the flowers are kept cut.

Pkt. 10c

6718 Plants. See line "A" in table on opposite page

6712 Cluster Bellflower (Gomerata Superba) (18")—Compact clusters of deep blue bell flowers are held closely around the erect and sturdy stems. A true perennial and a dependable grower. Plants, see line "B" in table on opposite page.

6716 Persicifolia Blue (Peach Bells) ckBJU (30")—A noble plant for the middle of the hardy border. Large, bright blue flowers neatly arranged around their straight stems which rise from low mounds of peach-like foliage. (Plants only.) See line "B" in table on opposite page.

1882 Persicifolia Alba ckBJU (30")—The white form of the Peach-leaf Bellflower is an outstanding hardy border plant. The artistic sprays are pure glistening white; a truly beautiful perennial.

**CAMPANULA (Bellflower)**

Calycanthema bksBJU (24")—This is the old favorite cup and saucer Canterbury Bell, a flower worthy of perpetuation in every garden of today.

1876 Seeds: Mixed colors. Pkt. 10c

6708 Plants—Mixed colors only. Price line "B", opposite.

**COLUMBINE**

(See AQUILEGIA above)

**DIANTHUS ejuB**

6740 OLD SPICE (Plant Pat. No. 499)—Old Spice is a choice hybrid of the old-fashioned Garden Pink. It is as hardy as an oak and grows in neat cushion-like form, bearing prolifically its spicy carnation scented blossoms of rich salmon pink.

Plants, 70c each; 3 to 9 plants, 62c each; 10 plants and up, 46c each.

6746 Dianthus Rose Cushion (3-4")—As a border or as a dainty novelty flower plant Dianthus Rose Cushion has no equal. The compact cushion-like mounds of silvery green foliage are neat and attractive all summer. In early summer the cushions are covered with dainty fragrant blossoms of brilliant rose. (See full color illustration on Page 30.)

55c each; 3 to 9 plants, 50c each; 10 to 29, 45c each; 30 to 100 plants, 40c each

**DIGITALIS (Foxglove) (48") bosBJN**

1950 Gloxiniabellflora Mixed—For stately and picturesque beauty, these have not been surpassed. The long tubular, spotted flowers hang in a mass on spikes 2'-3' long. Mixture includes purple, rose, yellow and white. Pkt. 10c

6748 Plants. See line "A" in table on page 33
PACIFIC HYBRID DELPHINIUM (72")

cjsBJS

Since the introduction of this superb class of giant Delphiniums it has become everyone's favorite. The huge florets 2½" and more in diameter are practically 100% double. Our seed stock comes directly from the originator and our plants are grown from especially selected strains.

1910—Black Knight Series—Dark Blue
1916—Galahad Series—White
1918 Guinevere Series—A clear pink lavender with white bee.

The individual florets range up to 3 inches in diameter.

1927 Percival Series—A companion to the Galahad Series. The large glistening white flowers with contrasting black bees are beautifully spaced on long tapering spikes.

1920 Summer Skies Series—Clear Blue

1914 Round Table Series—Many different crosses and blends are included in this mixture. Seed: Pkt. 50c; 1/32 oz., $1.50

BEARDED IRIS

Write for our summer list which will include Bearded Iris.

SIBERIAN IRIS

An established clump often produces fifty or more flowering stalks. Grows long, thin tubular stems with ornamental grass-like foliage.

6894 Peggy Perry 32". Early. Dainty ruffled, rich violet blue with a white center.

6899 Snow Queen 36"—An exquisite iris of snowy whiteness and firm wax-like texture. The flowers are large, well formed and produced in great abundance.

Prices: See line "A" below

IRIS, SPURIA

6900 Ochroleuca 42"—A Beardless variety of the Iris family that is rapidly growing in popularity. It is hardy and easy to grow, thriving in almost any locality but performing best where it has plenty of water. Flowers of soft white with a golden signal patch on the falls emerge in unusually artistic arrangement on tall sturdy stems. Its late season of flowering (after the Bearded Iris) and graceful form make it a most valuable cut flower plant as well as an ideal garden perennial. Plant in spring or fall. Price: See line "O" at right

LILY-OF-THE-VALLEY

7013 American Pips (for outside planting only)—Extra strong pips. Sold only in bunches of 25 pips each.

25 to 50, $2.20 per bunch; 75 to 225, $1.95 per bunch; 250-up, $1.75 per bunch

LUPINUS cjsCM

Perennial Phlox

THE BEST PLANT FOR MIDSUMMER FLOWERS

NO SUMMER GARDEN IS COMPLETE WITHOUT A PHLOX GARDEN

Perennial phlox is the backbone of the summer garden. No other perennial affords as many rich and varied colors and blooms as abundantly during the so-called "off season." There need be no more uncolorful seasons in your garden if you plant a few of these grand new phlox in prominent spots throughout the border. Deep, consistent moisture, fertile soil and a little shade in the afternoon are ideal for them.

Novelties and Giants

6939 PROGRESS
Extremely large flower heads with 1½ to 2-inch florets of a superb light blue accented with purple blue eyes. The color varies with the difference in climates and is particularly effective where cool damp nights prevail.

6935 PURPLE HEART
It is with justifiable pride that we offer to our customers this superior phlox variety. The individual florets are medium large and carried in good size trusses. Its eye catching color is a brilliant live shade of deep blue purple, intensified by a darker center and given "sparkle" by the dainty cream colored anthers.

Whenever flowers of Purple Heart have been displayed they have commanded the attention of amateur and veteran gardeners alike. We believe that you, too, will be proud to grow Purple Heart in your garden.

6943 SALMON BEAUTY
A real giant, having florets up to 1½ inches across and supported in large trusses on stalks 30 inches tall. A white eye in the giant salmon-pink florets makes this one of the most colorful of all phlox. The warm tones blend richly with other phlox colors. Salmon Beauty will add a splash of richness to your borders during midsummer.

Prices: See table, page 33, line "D"

PHLOX SUBULATA
(Moss or Mountain Pinks) (6")
6956 Vivid—The plants are very dwarf and exceptionally neat in habit. Lovely miniature bright pink flowers.

Price: See table, page 33, line "B"

Popular Phlox

6922 AFRICA
The flower heads are large and well shaped; composed of large brilliant carmine red florets, each with a blood red eye. Good strong stem and mildew resistant plant.

6930 DAILY SKETCH
A compelling magnificent rose, drawing one in for a close-up of its beauty. Immense flower heads of soft salmon pink florets with striking crimson eyes. An outstanding variety 3 to 3½ feet tall.

6933 JULY LIGHTS
An early blooming variety of medium height and good form. The color is soft rose red. Each floret is enriched with a deeper blood red eye.

6942 MRS. JENKINS
(Independence). Its vigorous growth and free flowering habit make it one of the best for mass planting. Pure white.

Each of above see table, page 33, line "B"

Inset: Daily Sketch
PRIMULA (Polyanthus) (8’)
cuAMs
2060 GIANT MUNSTEAD STRAIN—A wonderful improved strain of English polyanthus bearing giant flowers in many new and desirable colors. Pkt. 50c
6960 PRIMULA PLANTS—See table page 33, line “C”

PYRETHRUM (Painted Daisy) (24’)

2070 ROSEUM SINGLE A N D DOUBLE MIXED—An excellent variety of colors. 15% to 25% of the plants produce double flowers. Seed: Pkt. 25c

6968 PYRETHRUM PLANTS—See Table, page 33, line “B”

SHASTA DAISY
Chrysanthemeum Maximum
6998 MOUNT SHASTA djrsC (30’)—The aristocrat among Shasta Daisies. A beautiful pure white with high crested, fully double flowers 3” across. The sturdy, erect stems add to its remarkable character. Plants only: See table page 33, line “C”

VINCA djqxBV
6992 Minor (Grave Myrtle) (4’)—Glossy evergreen foliage forms a dense carpet sprinkled with blue flowers.
6994 Major (10’)—This variety has larger leaves and is more erect than Minor. Plants only, either of above. See table, page 33, line “A”

SWEET WILLIAM (Dianthus Barbatus) (18’)
ejsBJN
2150 Single Giant-Flowered Mixed—Pkt. 10c
2160 Double Giant-Flowered Mixed—Pkt. 15c

2180 Scarlet Beauty—Large single. Pkt. 15c

6976 SWEET WILLIAM PLANTS Single and double Giants Mixed. See table, page 33, line “A”

TEUCRIUM (12’)
cjpuNW
6984 Chamaedrys — Dense bushy plants with glossy evergreen foliage resembling dwarf boxwood; may be used in place of boxwood where the latter is not hardy. Can be clipped to suit any height up to 12 in. Plants only, see table, page 33, line “B”

VIOLET
6996 Odorata (Sweet Violet) (6’ cjlxAJ—The popular, well-known violet. Large, single deep violet blue flowers of exceedingly rich fragrance. Plants.
6997 ROYAL ROBE—This glorious new variety has extra large flowers of a lustrous shade of deepest violet blue. They are delicately fragrant and open wide like a viola, often measuring up to 1 inch across. The sturdy plants form a mound of large leaves from which strong erect stems grow to 6 inches or more in length.

Either of above, see table, page 33, line “B”

CONVENIENT GIFT CERTIFICATE
APPRECIATED ANY TIME — ANYWHERE

Now you can send a gift of living plants, shrubs or trees to anyone, anywhere from California to Maine. Just order a Gift Certificate for $5.00 or more for any Anniversary, Easter, Mother’s Day or Christmas, and the recipient can redeem it at planting time with the plants of his or her own choice.

A gift of Plants Will Grow in Beauty and Value

SEED AND NURSERY SPECIALISTS 35
**SUMMER FLOWERING BULBS**

Numerals in ( ) indicate approximate height at maturity in inches (”) or feet (’).

### Begonias

**TUBEROUS ROOTED (10-12’’) fts**

Few plants can equal the Tuberous Rooted Begonia for garden show in brilliancy of color, duration, and perfection of bloom. The ideal situation is in a filtered sunlight where there is plenty of fresh air, protected from strong winds, as on the north side of buildings where they receive sunlight a portion of the day.

For best results, the tubers should be started indoors in January or February. Plant first in moist sand, and after they are well sprouted, put them in 4 in. pots in good, rich soil (about one-third Peat or leaf-mold, one-third well-rotted manure, and one-third good sandy loam).

About June 1st, plant outdoors, spacing plants about 12 inches apart each way.

### MONTBRETIAS fthsCH

Giant Mixed (24-30’)

The flower stems are very fine for cutting. The mixture contains many bright shades of yellow, salmon, scarlet and orange.

### RANUNCULUS eorsN

(Buttercup)

A wonderful range of colors. Culture: Best germination is acquired by placing tubers in a flat of sand, cover about one inch and keep moist. Place in a cool room for about one week until sprouted, then plant outdoors when the soil becomes warm, placing the clumps downward. They thrive in a drained sand loam. A small amount of peat moss or rotted compost should be worked into the soil to a depth of six inches, if needed. Before planting, the bed should be thoroughly watered. Cover the bulbs 2” and set 4-6” apart. Water sparingly until plants are well established, then they can use an abundance of water.

### TIGRIDIA fhrsN

(Shellflower of Mexico)

Few flowers are more gorgeously colored or so beautiful. Plant in sunny position in a flower border in well-drained soil. Blooms from middle of July to September. Culture: Space large bulbs six to seven inches apart and five inches deep. They require average moisture, but can use lots of moisture during blooming season. ½ to 1” bulbs.

---

**ANEMONE** (St. Brigid Strain) (6-12’’) eorsS

These lovely poppy-like flowers are exceedingly brilliant when in flower and excellent for cutting. The flowers range from single to fullest double, in white, crimson, cobalt blue, lavender, heliotrope, rose pink, or salmon. The season for planting outdoors is early spring. Spring plantings bloom in summer. Culture same as Ranunculus.

**CANNAS (4’’) fksCN**

- **King Humbert**—Scarlet flowers, bronze foliage. Large flowers freely produced, and handsome, broad tropical foliage.
- **The President**—A rich glowing scarlet with immense rounded flowers, seven inches across, produced on strong stalks well above the heavy foliage. Free bloomer.
- **Orange Humbert**—A vigorous grower. Rich orange.
- **Yellow King Humbert**—Foliage a very dark green, flowers a deep rich yellow, softly spotted and blotched with bright red; measuring 3 to 4½ inches in diameter.

**Canna Plants**

Strong plants. Available April 20th through June.

- **King Humbert** 6326 The President
- **Yellow King Humbert** 6328 Orange Humbert

See Prices and Shipping Weights in table at right.

**MADEIRA VINE ftnCN**

8562 Climbing Mignonette—A vine which will cover a large space in a short time. Fleshy heart-shaped leaves, and racemes of feathery fragrant flowers.
CONTINUOUS BLOOM FROM SUMMER UNTIL FROST

LARGE EXHIBITION CLASS

RED
8610 American Triumph (C)—Unusual form. Spiky incurved petals in a bright shade of oriental red. 75c each; 3 to 9, 70c each
8614 Clara Clemens (Ball)—Deep rich red tipped with white. A favorite with the florists. $1.00 each; 3 to 9 tubers, 90c each
8618 Eleanor Francis (ID)—A vigorous plant producing many large long-stemmed flowers of bright vermilion red. Excellent cut flower. 60c each; 3 to 9, 55c each

WHITE
8673 Darcy Sainsbury (FD)—This spectacular beauty is sure to win the blue ribbons at the flower shows. It is one of the largest and most showy whites. 75c each; 3 to 9, 70c each
8675 Jersey Dainty (C)—Unequaled, in the large white class, for cut flower arrangements. Beautiful white, often tinged with pink. 60c each; 3 to 9, 55c each

YELLOW AND YELLOW BLENDS
8643 Ginger Rogers (ID)—A marvelous plant with a profusion of deep sulphur yellow flowers. The huge blooms are held high on long, stiff stems. $1.50 each; 3 to 9, $1.35 each
8648 Miss Glory (SC)—The flowers of luscious apricot yellow are perfect in form and massive in size. Its profuse blooming and perfect stems also are among the qualifications that class Miss Glory with the best Dahlias grown. 75c each; 3 to 9, 70c each

ORANGE AND BRONZE
8654 Freda Monich (ID)—A color that is different in dahlias, startling, intense mahogany bronze. A color novelty—a garden prize. $1.00 each; 3 to 9, $0.95 each
8657 Triumph de Paris (C)—Outstanding, both in the garden and as a cut flower. The rich orange flame which blends to yellow at the center is always exceedingly attractive. 75c each; 3 to 9, 70c each

BLUE
8658 Blue River (FD)—Large, and a profuse bloomer. As near to blue as we have in a dahlia. 75c each; 3 to 9, 70c each

LAVENDER
8668 Washington Giant (D)—Truly a giant. Pure lavender blended silver with long stiff stems. 60c each; 3 to 9, 55c each

PINK
8635 Louise (SC)—Large flowers of an exquisite delicate shade of pink with a white center. A beautiful flower. $1.00 each; 3 to 9, 90c each
8632 San Francisco (D)—Large twelve inch blooms in a gorgeous shrimp pink. One of the best for garden flowers. 75c each; 3 to 9, 70c each

MINIATURE CLASS

The Miniature Dahlias bloom more freely than the large exhibition class. Because they require less staking, tying and disbudding, they are easier to grow. Their dainty 2 to 4 inch blooms are unexcelled for cut flowers.

8683 Helly Boudewijn (Water Lily Type)—The lovely blooms of pure white are four inches or more in diameter. Because of their unique water lily form they are extremely popular for cutting. $1.00 each; 3 to 9, 90c each
8685 Little Diamond (C)—This one stands out among other Dahlias like a live ember. The bloom is small, of deepest pink overcast with a rich glowing coral amber, and the petals curve gracefully upward from the base. 75c each; 3 to 9, 70c each
8688 Sylvia (FD)—Crisp radiating petals of brilliant glowing red. 35c each; 3 to 9, 30c each

POMPON CLASS

These are ball type Dahlias with compact 1 to 2 inch flowers on strong stems. The plants average 3½ feet tall and bloom very profusely.

8693 Betty Ann—A particularly clear, light rose pink in the ever popular and neat pompon form. 35c each; 3 to 9, 30c each
8697 Little Snow White—Perfectly formed flowers. Somewhat larger than the average pompon in pure unmarked white. 35c each; 3 to 9, 30c each

Prices on all Dahlias are quoted f.o.b. Salt Lake City

Average Shipping Weight, ½ Lb. each; in quantities of 3 to 9 tubers, 6 oz. each. See “Transportation” on page 4
Gladioli

The Most Popular Exhibition and Cut Flower Varieties

WHITE
8716 Margaret Beaton—One of the most beautiful, and winner of many prizes. Pure snow white with small red blotch in throat. Price A
8720 Myrna—A beautifully ruffled creamy white that has won many prizes. Opens as many as ten perfectly placed florets. Price A
8724 Surfside—New spectacular crystal white. Price B

CREAM
8729 Lady Jane—A good grower, producing long straight spikes which hold 6 to 8 large blooms open at one time. The color is a clear cream with a little yellow on the two lower petals. Stands hot weather. Price B

BUFF and ORANGE
8732 Barcarole—An unusual but most exquisite clear clean shade of orange. A gorgeous new variety that must be seen to be appreciated. Price A
8734 MELLOWGLOW—An exquisite flower of heavy substance and large proportions. Its warm creamy buff tones give it unusual appeal in bouquets. The plants are medium height with good flower heads opening 6 to 7 florets. Midseason. Price D

ROSE
8708 Burma—An exquisite new variety, with large heavily ruffled florets of rich deep rose shading to a lighter throat. Medium height and vigorous, opening up to 8 florets at one time. Price E
8710 Chamouney—A new very distinct and graceful, clear rich rose. Price B

SCARLET and RED
8760 ALGONQUIN—A brilliant glowing scarlet of velvety substance with an unusual distinction of character. Price B
8774 Black Opal—Fine long spikes of very dark red. Most popular of the “black reds.” Price B
8768 RED LIGHTNING—A very bright, pleasing red with cream throat. The stamens, also cream, add to the striking color combination. The blooms are large well placed and many open at one time. A first prize winner, Midseason. Price B
8769 Red Charm—New popular red. See full color illustration opposite. Price C

PURPLE
8788 King Lear—Big ruffled velvety red-purple, with 5-6 blooms open at one time. Price A
8790 Purple Supreme—Just about perfection in purple. An extra tall stem and long flower head carries up to ten large flowers open. Especially fine in our dry mountain climate. Price C

LAVENDER
8779 ELIZABETH THE QUEEN—Truly the queen in its class, it produces giant ruffled flowers of clear lavender with darker lines in the throat. The plants are medium tall with long flower spikes and 7 to 8 blooms open at one time. Price C
8780 Minuet—Midseason—Considered one of the best lavenders in existence. Price B

SMOKY
8786 High Finance—An attractive combination of smoky grays and tans with tints of orange and a cream throat. An extremely novel and one of the few smokies that are adapted to floral work. Price C

LIGHT VIOLET
8784 Blue Beauty—Early Midseason—The best light blue. Price B

YELOW
8738 Mother Kadel—One of the best new clear medium yellows. The florets are medium size, of excellent form and heavy substance. A fine commercial and good exhibition variety. Price B
8740 OREGON GOLD—A superb novelty in the light yellow class. Large attractive florets on long straight slender stems. Opens 6 to 8 blooms at one time. Grows exceptionally well and is a gem for cut flowers. Price C

SALMON PINK
8744 Aladdin—Early—Immense ruffled salmon pink with cream blush. Strong grower. Price B
8747 MARGUERITE—A giant, both in size of flower and length of the tail stately stem. Marguerite is an excellent grower and a consistent blue ribbon winner. The color is a rich watermelon pink with contrasting cream throat. Good keeping qualities. Price B
8748 Picardy—Midseason—A clear, soft, shrimp-pink, A "must have." Price A

LIGHT and DARK PINK
8746 CORONA—Piquette on a flesh ground color. A prize for cut flower work. Price B
8756 Greta Garbo—This very fine new variety has a perfect color combination between the soft salmon rose of the buds and the delicate pink and rosy buff of the large well expanded flowers. The stems are always straight and the florets well placed. Price A
8754 Peggy Lou—A champion in clear geranium pink. Price A

Ruffled Gladiolus

38 PORTER-WALTON CO.
NEW-OUTSTANDING 'GLADS'

RED CHARM

A very fine new medium dark red from Canada. Deep and rich but not too dark, the large florets are wide open, of heavy substance and well placed on their tall, straight spike. Red Charm, a vigorous grower, will open eight or more beautiful florets which make an unbeatable spike for cutting or for exhibition.

Here is one reputable grower's opinion: "If I could grow but one red my choice would certainly be Red Charm."

Prices for Both Varieties of Glads:

- 1 to 9 Bulbs @ 15c each
- 10 to 49 Bulbs @ 12c each
- 50 to 99 Bulbs @ 11c each
- 100 to 249 Bulbs @ 10c each

ELIZABETH THE QUEEN

Very large, ruffled clear lavender with a touch of rose in the throat. The plants are medium tall, producing in early mid-season, a long spike of seven to nine lovely florets at one time. It is the best and most popular of the new lavender gladioli.
MRS. SAM McGREDY

Good performance year after year has established for each of these varieties a long-standing reputation. Among them are the Poinsettia which they receive enthusiastic approval. Include one or more of these plants in your garden and you will quickly see that their beauty and fragrance will be a welcome addition to your flower garden. See pages 44-45.

Blaze **(Plant Patent No. 10)**

*Everblooming Climber*

The everblooming Blaze is one of the most popular climbing roses in America. Its brilliant display of scarlet red clusters in June is an eye-catching scene in millions of gardens. Intermittent summer flowers increase each succeeding year as the plants become better established.

$1.50 each; 3 to 9 plants @ $1.25 each

---

Nocturne

**All America Rose Selection For 1948**

The buds of this dark red variety are long and gracefully shaped, each with an individual stem. As it opens the flower is very rich dark red with maroon shadings. The plant, strong growing, bushy, upright, produces many flowers.

$2.00 each; 3 for $5.00

---

**SPECIAL GROUP OFFER 8803**

Pinocchio—**Floribunda** *(Plant Patent No. 484)*

The delicate beauty of Pinocchio's gracefully pointed buds has won it wide acclaim and sensational popularity. The flowers, in great clusters of rich salmon flushed with gold at the base, are in bloom continuously from June through Fall. Perfect for bouquets and corsages.

$1.25 each; 3 or more plants @ $1.05 each
ALL-AMERICA SELECTIONS FOR 1948

Winners of the trials conducted in official All-American Rose Gardens in every section of the United States, these new roses are the very finest produced for introduction this year.

8905 Diamond Jubilee—P.A.F.—This 1948 All-America Winner is a rose of rare loveliness and perfection. The robust, many branched plants are especially generous in their production of the large 5 to 6 inch flowers. Warm glowing buff-orange in color and blooms open slowly and last long. (30¨) $2.00 Each

8940 Nocturne (Plant Patent No. 713)—See color illustration on opposite page.

8951 San Fernando (P.A.F.) A perfectly shaped, long streamlined bud, an intense brilliant red color, and a rich heady perfume are the outstanding Characteristics of this All-American Selection. The petals of glowing current red, changing to bright scarlet, have a firm heavy texture which gives them a long lasting quality. $2.00 Each

8956 Taffeta (Patent No. 716). With each change of the season this new All-America Rose brings out an exciting new combination of colors. Sometimes rose-pink, salmon or apricot, its predominant color is rich carmine rose in the bud, changing to begonia rose in the open flower. The reverse of the petals is tinted yellow. Because of its richly colored, long-stemmed, perfectly-formed buds Taffeta is exceptionally fine for cutting. Delightfully fragrant.

CHEAP

8956 peace (Pat. No. 591)—The All America Rose selection for 1946. Peace is truly a superior rose both in flower and in the hardy, vigorous, disease-resistant plant. The attractively cupped, very double, high-centered blooms open from buds of golden yellow etched with pink; change to pale gold and finally to iridescent cream. The large petals are trimmed with apple-blossom pink that deepens as they gradually unfold into glorious 5 inch blooms.

8948 Rex Anderson (Plant Patent No. 335)—One of the few highly dependable white roses. The perfectly formed flowers which open slowly are large, fully double blooms of delicate ivory white. Vigorous and free blooming. (24") $1.50 each

8956 Show Girl (Plant Patent No. 646)—A strong upright grower, branching freely and producing a constant supply of amazing long, intense pink buds. Pleasing fragrance. $1.50 each

8957 Signora (Plant Patent No. 201)—Buds of warm brownish orange open to lighter mandarin and salmon. Signora is a tall vigorous grower with glossy dark green foliage, in many respects superior to the well known President Herbert Hoover. Very fragrant. (30-36") $1.35 each

8962 Yours Truly (Plant Patent No. 697)—Very large, beautiful cupped flowers of Bengal rose. Here is a rose which likes summer heat, producing better blooms which do not fade. Long-stemmed and fragrant. (24-30") $1.50 each

SEED AND NURSERY SPECIALISTS 43
Prices: $1.00 each;  
See quantity prices on page 46.

**CRIMSON RED AND SCARLET**

8806 **CHRISTOPHER STONE**—A glowing velvety scarlet crimson that holds up well in hot weather. Mildly fragrant and very popular.

8810 **ETOILE DE HOLLAND**—Large semi-double flowers of richest red and pleasant fragrance. Hardy and vigorous.

8812 **Grenoble**—Glorious deep crimson-red.

8814 **McCREDY’S SCARLET**—Dark glowing rose-scarlet flowers of large size.

8818 **Night**—Its the best of the deep dark reds. The well shaped buds and fully double flowers are a deep crimson with black and maroon shadings. Appealing spicy fragrance.

8820 **Poinsettia**—Glowing fire red; the brilliance of poinsettias at Christmas time. Long pointed buds, vigorous.

8822 **Red Talisman**—With the perfect bud form of Talisman and a velvety blood-red color, this upright growing rose is one of the best reds.

8864 **Dainty Bess**—Large single, rose pink, waxy-petalled blooms with wine-red stamens. Very popular.

8866 **EDITH NELLIE PERKINS**—Lovely flowers in delicate tones of light cerise pink. Inside, the petals are suffused with gold.

8872 **Editor McFarland**—Perfectly formed, fresh deep pink.

8880 **Isobel**—One of the favorite singles, bright orange-toned pink.

8874 **Picture**—Warm pink, under tones of salmon. A dainty flower of exquisite form.

8876 **PINK DAWN**—Large deep rose buds opening to pink with shades of dawn-grey and touched with orange at the base. Pink Dawn has a delightful fragrance.

8878 **The Doctor**—Long, pointed buds, enormous blooms. Exquisite silvery pink. Intensely fragrant.

**WHITE & BLUSH WHITE**

8889 **Innocense**—Large single blooms of pure white, with wine-red stamens.

8886 **McCredy’s Ivory**—Large, well-shaped creamy white, fragrant.

8888 **Mme. Jules Bouche**—Medium sized gracefully formed white flowers, with a delicate pink flush in the center. It has a good fragrance and is a consistent bloomer.

8944 **Pedralbes**—A most admirable rose with large 5 inch long stemmed blooms of unique Waterlily form. Although the long painted buds are pale lemon yellow, they change to creamy white when opening and finally to pure white. Willowy plants (30” tall)

**YELLOW**

8850 **Cecil**—Dainty single flowers of clear buttercup yellow.

8851 **Golden Dawn**—A lovely, well-formed flower of sunflower yellow changing to lemon. It is a vigorous grower, and a profuse bloomer. Fragrant.

8856 **Mrs. E. P. Thom**—The beautifully formed buds develop into perfect blooms of rich yellow with delicate fragrance.

8857 **Mrs. P. S. DuPont**—Free flowering, double, rich yellow. A good grower and an excellent rose.

8858 **Sœur Thérese**—Exceptionally fine, long pointed buds of silvery yellow, changing to daffodil yellow as the flower matures. Fragrant.

8855 **Sunkist**—A very free blooming medium yellow with long, strong stems. Moderately fragrant.
COPPER-SALMON

8832 Autumn—Startling; rich burnt orange yellow and red.
8830 CONDESSA DE SASTAGO—The bush is a vigorous grower with an abundance of glossy disease-resistant foliage. The blooms are deep coppery pink inside with golden yellow reverse.
8836 DUQUEESSA DE PENARANDA—The very shapely buds are an unusual shade of apricot orange; opening smooth, slightly lighter tones.
8834 Girona—Richly fragrant flowers of soft golden yellow with a collar of Tyrian rose. A vigorous grower.
8838 Heinrich Gaede—Bright vermillion toned gold! good form and fragrance.
8839 Mrs. Sam McGredy—There is no other rose that will compare in color with Mrs. Sam McGredy. Very rich copper-orange, heavily flushed with Lincoln red. The buds are long-pointed and sweetly fragrant; held on slender stems above the beautiful bronzy green foliage.
8840 Orange Therese—A beautiful rich orange shaded flower with the same perfectly formed bud and vigorous habit as its parent, Soeur Therese.
8846 President Hoover—Striking maroon-orange gold and cerise, pink.
8848 Talisman—Sensational rich golden-reddish apricot, stained copper.

Everblooming Climbing Roses

9030 Blaze Climber—Popular scarlet Climber. (See color illustration page 42.)
9054 CL. COUNTESS VANDAL—Climbing form of the lovely bush rose. Long tapered buds of salmon pink, shaded copper and gold. $1.35 each
9056 CL. ETOILE DE HOLLANDE—Magnificent both in bud and bloom. Flowers identical to the bush form.
9064 CL. Heart's Desire—Large deep red flowers in great quantity, equal to those of the bush form which has enjoyed extreme popularity ever since its introduction. $1.50 each
9068 MERMAID—Blooms steadily throughout the season and produces quantities of exquisitely beautiful single flowers of great size, pale sulphur-yellow with a gold center. Its bright, glossy evergreen foliage is just as beautiful in winter as in summer.
9076 CL. MME. JULES BOUCHE—Best double, white, borne singly on long stems; pleasantly fragrant.
9082 CL. Mrs. Sam McGredy (Plant Patent No. 394)—Perfectly formed, long-stemmed buds and lovely flowers of rich coppery orange. Its luxuriant glossy foliage will quickly cover a fence or arbor. $1.50 each
9086 CL. Picture (Plant Patent No. 524)—Hundreds of clear rose pink, long-stemmed flowers, each one a "perfect picture" will adorn the Climbing plant of this popular variety. Enchanting fragrance. $1.50 each
9092 CL. Red Talisman—The long stemmed, perfectly formed buds of Talisman are admired by everyone. With the same popular form in a velvety, blood-red shade, Cl. Red Talisman is a truly spectacular rose. Rich fragrance. Exceptionally vigorous grower.
9098 CL. TALISMAN—Flowers same as bush form; rich golden, reddish-apricot stained copper.
9099 CL. Texas Centennial—An excellent grower, producing armfuls of gorgeous carmine-red blooms. Beautiful form and good stems. $1.50 each.
Price of all Everblooming Climbing Roses, except where noted, $1.25 each. See quantity prices on page 46.

Hardy Climbing Roses

9036 AMERICAN BEAUTY—Has the same deep rose-pink color, large size and sweet fragrance of the American Beauty bush type.
9034 CRIMSON RAMBLER—Large clusters of small scarlet flowers. Very hardy and a vigorous grower.
9040 DR. W. VAN FLEET—The long, pointed buds are of rich flesh-pink on stems 12-18 inches long.
9042 PAUL'S SCARLET—The flowers are an intense vivid scarlet, semi-double, and very freely produced in clusters of from 3 to 20 blooms on long-branched canes. A mass of color.
9044 PAUL'S LEMON PILLAR—Pale lemon buds and light yellow double, well-formed fragrant flowers. Strong grower.
9046 MARY WALLACE—Flowers are well formed, rose-pink with salmon base; large, glossy foliage.
9048 SILVER MOON—Beautiful semi-double flowers four inches and over in diameter, pure white, beautifully cupped with golden stamens in center. Price of all hardy climbing roses, $1.00 each; see quantity prices on page 46.
Floribunda Roses

Hardy, everblooming, specially bred for mass planting. They are not only permanent but are more colorful and beautiful than the tender-foliage bedding plants used heretofore for this purpose. Plant about 16 inches each way.

9006 Dagmar Spaeith—A true white sport of Lafayette bearing flowers of the same lovely form. Its large showy trusses are produced all summer. It is often called the best white floribunda.

9009 Donald Prior (Plant Patent No. 377)—Few roses can equal the rugged growth, generous production of blooms and the vivid deep red color of Donald Prior. The entire plant is covered with dense flower clusters with gracefully waved petals. (30-36") 2 yr. No. 1. $1.00 each

9012 Else Poulsen—Lasting brilliant, two-toned rose-pink. Semi-double, sweetly scented. (H. 30-36") 2 yr. No. 2 75c

9018 Improved Lafayette—Medium sized deep glowing red flowers suffused with vivid crimson. (H. 18-24") 2 yr. No. 2. 75c

9016 Pincioch (Plant Patent No. 484)—Persistently in bloom. The dainty flowers are soft salmon flushed gold at the base. (See color illustration on page 42.) 2 yr. No. 1. $1.25 each

9011 Poulsen's Yellow—A true yellow floribunda. The branching sprays carry both dainty carmine tinted buds and double clear yellow flowers. (24") 2 Yr. No. 2 75c each

9017 World's Fair (Plant Patent No. 362)—This beautiful large flowered rose is one of the most outstanding floribundas. The bushy plants are almost covered with the clusters of velvety rich scarlet flowers which become deep maroon in the fall. (30") 2 Yr. No. 1 $1.25 each

Polyantha Roses

The Appropriate Background for the Hybrid Tea Rose Garden

HYBRID PERPETUALS

These were the popular roses of forty years ago, and are no less dependable in the gardens of today, particularly in colder sections and high altitudes.

8964 American Beauty—Carmine-red.
8968 American Beauty White—Vigorous grower.
8970 Paul Neyron—A thornless bush with gigantic pink flowers. Fragrant.

SWEET BRIER ROSES

In the shrub border or as a background for a bed of Hybrid Tea Roses there is no finer subject than one of the sweet briers or shrub roses.

8974 Dr. Eckener—Semi-double flowers of coppery rose and golden yellow. Very fragrant. (H. 5'-6').
8976 F. J. Grootendorst Red—Red flowers in clusters. (H. 3'-4').
8990 Skyrocket—Large clusters of brilliant red blooms throughout the entire season. (H. 5'-6').

Price of all "H-P." Rugosa and Brier Roses, $1.00 each

See quantity prices at left

RUGOSA AND HYBRID RUGOSA

The Rugosas are a distinct class having dark green, very deeply wrinkled leaves and double flowers with short ruffled petals.

8974 Dr. Eckener—Semi-double flowers of coppery rose and golden yellow. Very fragrant. (H. 5'-6').
8976 F. J. Grootendorst Red—Red flowers in clusters. (H. 3'-4').
8990 Skyrocket—Large clusters of brilliant red blooms throughout the entire season. (H. 5'-6').

NOTE! DETAIL PLANS FOR SPRING DEVELOPMENT MUST BE DRAWN BEFORE MARCH 1st.
PYRAMIDAL JUNIPERS

9464 Scopularum (Colorado Juniper) gJvNZ. Compact, columnar growth from a single central stem. It is of unusual silver blue color. 3-4', $8.50; 4-5', $11.50.

9466 Virginiana Cannarti (Cannart Red Cedar) gJvNZ. The deepest, richest green color of all Junipers, which, together with the fine textured foliage and plume like twigs, gives a luxuriant effect. When grown in naturalistic plantings not sheared it has the appearance of a branchy Spruce, but of course, is smaller. Cannarti Juniper may be trimmed and maintained at any size desired. 3-4', $8.50; 4-5', $11.50.

9468 Virginiana Pyramidsiforma (Dundee Juniper) gJvNZ—Makes a compact, symmetrical pyramid of moderate size. Grayish green in summer, turning a purplish plum color in the fall. 3-4', $8.50; 4-5', $11.50.

9470 Virginiana Red Cedar (Platte River Type). A dense and columnar tree with lustrous foliage of bluish green turning to purplish red in late fall and winter. It is used extensively in landscape work and being a large grower it is particularly valuable for windbreak protection. 3-4', $8.00; 4-5', $10.50.

9462 Chinese Pyramidalis Blue (Column Juniper) gJvNZ. The popular Chinese Juniper is one of the most adaptable to use in landscape plantings. Its rich blue green color is a pleasing complement to all colors of brick and stucco. It is a rapid grower and will thrive in any situation where the sun shines for half a day. 3-4', $8.50; 4-5', $11.50.

Use "Scram" to protect Evergreens from dog damage.
Cat. No. 3347 8 oz. pkg. 49¢

THUYA (Arborvitae) hjstunNZ

Pyramidal Varieties

9474 Orientalis Elegantissima (Gold Tinged Column Arborvitae). A narrow pyramidal Evergreen of tall and stately form. Its habit of growth is more compact than that of other golden pyramids. Highly prized as an accent subject because of its distinct form and contrasting color.

Gal. cans, 1-9; $1.50; 10 up, $1.30; Extra heavy, 3-4', $8.00.

9476 Occidentalis Excelsa (Western Arborvitae). This excellent variety, which is native in Western America, has the richest most luxuriant green color of all the Arborvitae. It is of broad conical habit, is a rapid grower, and very beautiful either in its natural form or closely trimmed as a formal specimen.

9478 Occidentials Pyramidalis (Pyramids Arborvitae). (Not available this season.)

Dwarf Varieties

9484 Biota Bonita (Meldensis). Dwarf habit, neat pyramidal form and rich deep green foliage which grows vertically with a pressed appearance. Identical to the popular Orientalis Aurea Nana except for its green color. 18-24", $5.50; 24-30", $6.25.

9486 Globosa (Globe Arborvitae). Forms a low dense globe of a handsome shade of green. Ideal for formal plantings or on either side of an entrance or step. 18-24", $5.00.

Gal. cans, 1-9, $1.50 ea.; 10 up, $1.30 ea.; 15-18", $4.50.

NOTE: Yearly trimming of Junipers and Arborvitae is very beneficial, making sturdier, more compact trees that sustain less winter snow damage. Also very important is the fact that the plants may be kept at any desired size. In the Mountain States trimming should be done in early spring or about September 1st.
All Evergreens are quoted f.o.b. Salt Lake City. Most sizes are too large and heavy for parcel post and must therefore be shipped by freight or express.

JUNIPERS
Spreading Varieties

Cat. No. 9450 PFITZER (J. Chinensis Pfitzeriana gjuvNZ)—This is the most widely planted and generally satisfactory of all semi-dwarf creeping Junipers. Large, fast grower. 1 gal. can, 1-9, $1.50 ea.; 10 up, $1.30 ea.; 15-18", 4.50; 18-24", $5.50.

9459 PFITZER COMPACTA gjuvNZ—A new introduction that is very adaptable for limited areas and small houses. It is a low, compact grower that matures at one-half the size of its parent, the Pfitzer Juniper. 18-24", $6.00; 24-30", $7.50.

9452 SABINA TAMARISCIFOLIA gjuvNZ—Especially desirable in plantings where space is limited or when used against a house with a low foundation. It is a smaller and more compact grower than Juniper Pfitzer, attaining only 6 to 7 feet spread. The dense, metallic blue green foliage and uniform habit make admirable specimens for the corners of the lawn.
Gal. cans, 1-9, $1.50 ea.; 10 up, $1.30 ea; 18-20", $6.25.

9454 SABINA VON EHRON gjuvNZ—This variety of the Savin Juniper is not so well known as its relative, the Tamariscifolia. It is a very fast grower, developing a more loose and open appearance with its rich green slender twigs extending at a half spreading, half upright angle. 24-30", $7.25.

9460 Horizontalis Plumosa (Andorra Juniper)—A true creeping juniper, and perhaps the most charming of the low growing varieties. The branches extend almost horizontal outward from the center, making a beautiful rosette of fine, soft green foliage. Each fall the foliage turns to a bronzy purple color which is retained all winter.

The habit of the Andorra Juniper (flat-topped about 18 inches tall and 6 to 8 feet across) makes it an ideal plant for foundation, bed, or rockery planting. It is the best low juniper for planting in partial shade. 1 gal. can, 1-9, $1.50 ea.; 10 up, $1.30 ea.; 15-18", $4.75.

WINTER PROTECTION OF EVERGREENS
Because Evergreens hold their leaves all winter they are never entirely dormant. The best protection against winter damage, therefore, is a thoroughly moisture filled condition within the plant itself. Be sure that the soil around your Evergreens is moistened to a depth of about two feet during the last four weeks before the ground freezes. After that time apply a coarse mulch around the base of each tree.

In situations exposed to excessive wind or bright sunlight provide a windbreak, shade or loose wrapping.

NOVELTY SPECIMENS

9453 PFITZER PYRAMIDS g/jstNZ—Trimmed to upright form, these special pitzers give a distinctive weeping effect which is very beautiful in a specimen plant or as a contrast with surrounding foliage. 30-36", $10.00.

9455 SABINA VON EHRON GLOBE gjuvNZ—These are perfect, formally globed specimens. They are trimmed plants of the very adaptable Von Ehron Juniper which is itself a handsome dwarf evergreen of semi-spreading habit and slender rich green twigs. Compact globs, 15-18", $3.75.

**BROAD-LEAVED EVERGREENS**

For Modern Distinctive Landscape Plantings

The Berries and Foliage Are Beautiful in Winter House Decorations

All Evergreens are quoted f.o.b. Salt Lake City

**BARBERRY**

9518 Berberis Sargentii 4' hlpvBUW. An upright, half spreading species with reddish tan branches and oblong, spiny-toothed leaves, dark glossy green above and light green underneath. Very attractive as a contrast in beds of conifers. 1 gal. cans, 1-9, $1.50 ea.; 10 up, $1.30 ea.

**BOXWOOD**

9519 Dwarf houwSW—A formal plant for gardens where pyramids and globes are desired. Foliage glossy and dense. Especially effective for entrance plantings. Dwarf compact habit. 22-24", $12.75.

**COTONEASTER**

9521 Apiculata H 4'. A relatively new plant which is proving to be one of the most important in the small shrub group. The round, waxy, dark glossy green leaves are held through most of the winter. It is a moderately rapid grower with round-irregular habit making an ideal low, compact shrub. The flowers of pinkish white are followed by exceptionally large velvety red fruits.

B & B, 24-30", $5.00.

9522 Horizontalis 18" higvBENW. Small glossy green leaves artistically arranged along the almost horizontal branches. An ideal dwarf shrub for the partially shaded situation.

1 gal. cans, 1-9, $1.50 ea.; 10 up, $1.30 ea.

**EUONYMUS**

9528 Japonica 10pBENW—H-8'. Upright habit of growth with a dense, glossy, handsome foliage.

1 gal. cans, 1-9, $1.50 ea.; 10 up, $1.30 ea.; B & B 30-36", $5.00.

9526 Fortunei Carrieri 36" (Glossy Winter Creeper). A low spreading Evergreen that fits beautifully into foundation plantings and beds and is very fine for low hedges. Produces its showy pinkish orange fruits abundantly.

1 gal. cans, 1-9; $1.50 ea.; 10 up, $1.30 ea.; B & B 18-24", $2.75.

**MAHONIA**

9530 Aquifolia (Oregon Hollygrape) houvBENW H-5'. Leaves shiny with attractively changing shades of green. Flowers yellow in dense clusters, followed by light purple berries.

Established in 1 gal. cans, 1-9, $1.50 ea.; 10 up, $1.30 ea.; Field grown, 18-24", heavy, $4.75.

**PYRACANTHA**

9534 Coccinea Lalandii higvBENX, H-10'. Leaves dark, glossy and evergreen. Flowers white, in clusters, followed by orange-scarlet berries so much admired, large, fast grower.

Established in 1 gal. cans, 1-9, $1.50 ea.; 10 up, $1.30 ea.; 3 gal. cans, $3.75.

9536 COCCINEA PAULCIFLORA (Dwarf Pyracantha) (5') hjigvBENW—The hardiest pyracantha, also outstanding for its compact rounded formal habit. Its twigs and leaves are shorter than those of Pyracantha Lalandii and it produces fewer flowers and fruit, but is prized for its fine form, texture and dwarf habit.

Established in 1 gal. cans, 1-9, $1.75 ea.; 10 up, $1.50 ea.; 3 gal. cans, $4.50.

**VIBURNUM**

9538 Burkwoodii (Gardenia Scented Snowball) hjigvANW (H-4'). Most outstanding shrub introduction in recent years. Waxy, pinkish white flowers. The rich, glossy, semi-evergreen foliage turns purplish bronze with winter weather.

1 gal. can, 1-9, $1.50 ea.; 10 up, $1.30 ea.; 18-24" B & B. $4.00.

**CONIFERS**

**PINUS (Pine)**

9494 Austrian gjtNW—The leaves are two in a sheath, straight and slender, from 4 to 5 inches long, of a deep green color. Gas and smoky atmosphere have no effect on its growth.

30-36", $6.50; 3-4', $8.50.

9498 Mugho (Dwarf Pine) gjuvNW—A low, dense plant of formal habit with bright green leaves. It is best used in entrance or foundation plantings, also as a rock garden plant or single specimen. It does well in a wide variety of soils and exposures.

**SPRUCE (Picea)**

9500 Black Hills gjtNW—Not available this season.

9508 Colorado Blue (P. Pungens Glauca) gjtNW—Not available this season.

9504 Moerheim Blue gjtNW—Not available this season.

9506 Norway gjtNW—Not available this season.
MAHONIA AQUIFOLIA

(Oregon Hollygrape)

In every home landscape planting, regardless of size or style, there is a spot where the broad-leaved evergreen Mahonia will create just the right effect. Its texture, color and medium low habit are in pleasing contrast with Junipers or Arborvitae.

18-24", Heavy, $4.75

MUGHO PINE

Mugho Pine is one of the hardiest of all dwarf evergreens. Its adaptability to various types of soil as well as to both sunny and shady situations makes it a popular subject in many gardens. Its low globular form is just right for setting off the entrance of your home or for marking the end of a walk or driveway.

In form as well as in texture Mugho Pine adds an interesting contrast with other shrubs or evergreens.

12-15", $3.75; 15-18", $4.75; 18-24", $5.75

PYRACANTHA (Firethorn)

(Coccus Lalandii)

Pyracantha is the most popular of all broad-leaved evergreens in Western U. S. A. The reason—it is always beautiful. Fragrant white flowers adorn the plant in Spring while Fall finds the flowers turned to clusters of bright orange-red berries which hang all Winter. The quick growing, branchy shrub is never without its covering of deep green, glossy foliage.

In shade or sun, or on dry soil Pyracantha continues to thrive, producing its never ending beauty.

In 1-gal. Cans, $1.50
In 3-gal. Cans, $3.75

The Evergreen Shrub of Perpetual Beauty
BARBERRY
MENTORENSIS

Even when young, Mentor Berry, makes an exceptionally fine looking hedge. Because of its sturdy, erect and uniform growth, it requires no trimming except where a more formal effect is desired. Its darker green foliage remains most of the winter.

15-18”, $0.75; 10 for $5.00; 100, $40.00
18-24”, $0.90; 10 for $6.00; 100, $50.00
24-30”, $1.10; 10 for $8.35; 100, $70.00

FORSYTHIA

The showy border Forsythia. Its pleasing habit of growth, hardiness, and its large profusely borne flowers rate it the best and most useful of all Forsythias.

18-24”, 75c; 2-3’, 90c

RED LEAVED BARBERRY

Identical with the popular Japanese Barberry except foliage, which is a rich, bronzy red color.

15-18”, 70c; 10 for $6.30; 100 for $56.00
18-24”, 90c; 10 for $7.90; 100 for $71.00

BEAUTY BUSH

Few shrubs have gained as wide spread prominence as Beauty Bush. The plant is densely set with graceful arching branches and in June is literally covered with pale pink flowers. Where given plenty of room to grow Beauty Bush makes a more refined symmetrical plant with less pruning than is required by most other shrubs.

2-3’, $1.50

ALMOND
9190 Pink Double Flowering hkAVUV (H 3-4, S 4) — Completely covered with sweetly scented flowers before the leaves appear. 18-24", 90c; 2-3', $1.25.

ALTHEA (Hibiscus or Rose of Sharon) (H 10', S 5')
hjptCNVW
9194 Coelestris Blue — The gorgeous single disc-like flowers are produced in great quantity. Planted with the white variety, Snowdrift, it creates a most beautiful color effect.

9196 Snowdrift — Giant single, pure white flowers fully 4 inches across.

9198 Rubus — Very large wide open flowers of deep rose-pink with deeper center. The best and most brilliant of all single pink varieties.

Price of each of above, 2-3', $1.00 each.

9214 HANSEN'S BUSH CHERRY gkptBUV

These new dwarf fruit bushes (H 3-4, S 4-5) are excellent for hedges and ornamental shrubs. They are perfectly hardy, even in the generally colder sections where they are extensively planted for their fruit.

2-3', 75c each.

BERBERIS
9202 Japanese Barberry gipvBENVW (H 3-4, S 3-4) — Too well known to require any comment. In fall its colored foliage and red berries cheer the boundaries of millions of gardens and homes. 18-24", 75c each.

9204 MENTOR BARBERRY (Berberis Mentorensis) Pat. No. 99 gipvBENVW (H 3-4, S 3-4) — New hardy, semi-evergreen barberry. Sturdy, erect growth carries a thick, dark, attractive green foliage right down to the ground.

54 PORTER-WALTON CO.
GORGEOUS NEW FRENCH LILACS

(H 10-18') gittBNWV

GROWN ON THEIR OWN ROOTS
ADAPTED TO INTERMOUNTAIN CLIMATE

Lilacs are best planted from late October until the ground freezes, but very early spring planting will also give good results.

(D) following the name indicates double arrangement of petals. (S) indicates single form.

9284 Charles Joly (D)—Produces fine long lasting blooms of an even toned dark purplish red. 2-3', $1.75

9296 Mont Blanc (S)—Buds greenish yellow, opening pure white. 2-3', $1.75

9300 Pres. Greve (D)—Not new, but still regarded as one of the best double clear blue lilacs. It is a strong grower. 2-3' $1.75

9308 Souv. de Ludwig Spaeth (S)—Very popular among lovers of dark colored flowers. Buds carmine to Schoenfield's purple, opening rose purple. 18-24", $1.25; 23-2', $1.75

LILAC SPECIES

9314 New Chinese or Rothomagensis gittBNWV (H-10')
A distinct hybrid variety with slender stems, reddish purple flowers. 2-3', $1.00

Hedge Size, 15-18", 1-9, 60c ea.; 10-29, 52c ea.; 30-100, 46c ea.

9316 Persian gittBNWV (H-10')—Not available this season.

LILAC VULGARIS (H-12-15') gittANORWV

9318 White Common Lilac 2-3', $1.00

9319 Purple Common Lilac 2-3', $1.00

PHIADLPHUS (Mock Orange) gittBNWV

9324 Coronarius (H 6-8, S 4-5)—Large, single flowers; grows tall and upright. 2-3', 90c

9326 Lemoine (H 4-5, S 4)—Not available this season.

9328 Virginalis (H 7-8, S 7)—A vigorous, tall grower, with very large, double-curved, sweetly scented clusters of pure white blossoms throughout the season. 18-24", $1.00; 23-2', $1.25

9325 SNOWFLAKE (Plant Patent No. 538)—This new Double Mock Orange is truly outstanding. It is all double, every blossom intensely double, exceptionally sweet scented, glistening white, large flowering, profuse bodmer, symmetrically formed and gracefully branched, neat, beautiful foliage, rugged, fast growing, and exceptionally hardy.
It is reasonably free from insect pests, and will grow to a height of 10 to 12 feet as a large specimen shrub, or if desired can be easily kept within bounds by simply a little pruning. It will thrive in ordinary soil, either sun or part shade. These many favorable features make it a truly remarkable shrub. 2-3', $1.50

POTENTILLA

9330 Fruiticosa gkmuFNWV (H 2-3, S 3)—A dwarf shrub, producing an abundance of yellow blossoms over a long period of time. 18-24", $1.00

RHODOTYPOS

9338 Kerrioides (White Kerria) hjmsEVW (H 4-5, S 5)
White flowers followed by black fruits which hang all winter; foliage very attractive. 2-3', $1.25

RHUS (Sumac)

9340 Canadensis Dwarf hjmsuxBNWV (H 3-4, S 4-5)—Blossoms yellow catkin-like, its foliage differs greatly in texture from that of other Sumac and is very fragrant when crushed. 18-24", 75c

9342 Glabra gmtBNWV (H 6-8)—A new cut-leaf variety with a splendid fruit display. 3-4', $1.00

9344 Typhina (Staghorn Sumac) gjmxBNWV (H 10-12)—Develops colored leaves and red fruit. 4-6', $0.90

ROBINA hjmsuxBUWW

9348 Hispida (H 4-5, S 5)—This beautiful shrub is much appreciated because of the abundance of its large, pea-like, rose-pink flowers. 24-30", $1.00

SORBARIA gilotCSVX

9358 Aitchinsoni (H 6-8, S 6-8)—Handsome shrub, the bright green fern-like foliage contrasting well with the bright red stems; white flowers in upright panicles, 12-20" long. 3-4', $1.25

SPIREA

9362 Froebeli gjusvBNVY (H 4, S 4)—Leaves are purple when young. Deep rosy blooms are borne in abundance. 15-18", 50c; 18-24", 75c

9364 Prunifola (Double Bridal Wreath) hjswANVY (H 6, S 6)—One of the best; a beautiful shrub of medium size, double white flowers. 2-3', $1.25

9366 Thundergii gjsvANVY (H 5, S 5)—Graceful and beautiful at all seasons; flowers white. 2-3', 90c; 3-4' $1.00

9368 VAN HOUTTE (Bridal Wreath) gjsvBNVY (H 6-8, S 6)—It is round and graceful, with long, thin, arching branches. Flowers in white clusters. 18-24", 45c; 23-2', 75c; 3-4', $1.00

Van Houtte for borders and hedging

18-24", 1-9, 45c each; 10-29, 40c each; 30-100, 36c each

SYMPHORICARPUS gjmnpusurBNV

9372 Chenaulti (H 4-5, S 5)—A hybrid, the foliage is smaller and the plants are nearer throughout than vulgaris. Handsome red fruit. 18-24", 1-9, 50c each; 10-29, 44c each; 30-100, 40c each

23-2', 75c each

9374 Racemosus (Snowberry) (H 4-5, S 4)—A graceful shrub, chiefly planted for its waxy white fruit. 2-3', 75c; 3-4', 90c; 4-5', $1.00

See quantity prices on opposite page.

TAMARIX gjsuxBNWV

9378 Hispida (Kashgar) (H 15, S 6)—A distinctive variety with delicate soft pink sprays of flowers in early spring and again in July. Prune branches to the ground when planting. 2-3', 90c

VIBURNUM

9384 Americanum gjmzBNV (H 10-12', S 10)—( Cranberry Shrub)—The foliage is large, three lobed and of exceptionally heavy texture. Its bright scarlet fruits hang in large clusters during the fall and winter. 2-3', $1.00

9386 Dentatum (Arrow-wood) gjmzBNV (H 6-8, S 6)—Creamy white flowers, followed by blue-black berries and purplish red foliage. 3-3', $0.90

9388 Opulus Sterilis (Common Snowball) gjmzBNV (H 8-10, S 10)—Ball-like, pure white flowers. 2-3', $1.25

WEIGELAS hjrBSV

9396 Bristol Ruby (Pat. No. 492). (H 5, S 5)—See color illustration on back cover. 2-3', $1.50 each

9398 Rosea (H 5-6', S 5)—A dense, rounded shrub with arching branches. Valued for its handsome, rose colored flowers. Plant in sunny exposure. 2-3', $0.90
Charming Climbers and Ground Covers
to Soften Projecting Lines of Land or Architecture

AMPELOPSIS
9404 Englemani (New Virginia Creeper) gjmBENVWV (H 35-40°)—Self clinging to most surfaces. 2 yr. no. 1. Each 65c.
9406 VEITCHI (Boston Ivy) giN. Clings firmly to smooth surfaces. The glossy refined foliage is a most handsome wall covering. Dormant Roots 90c each.

BIGNONIA (H 20°) gmjFNV
9408 MME GALEN (Giant Trumpet Vine). The most striking improvement in this family. Broader trumpets and a beautiful rich shade of orange. 2 yr. Each $1.25

CELASTRUS (Bittersweet)
9412 ORBICULATUS—jbENV (H-25°). More vigorous habit and better foliage than Scandens. Excellent for covering fences or arbors but is grown chiefly for its fruit which makes beautiful cut sprays for winter decorations. 2 yr. 90c each.

CLEMATIS
9414 Paniculata—hjoCN (H 25°). A strong growing but graceful vine. Produces an array of fragrant white flowers from August until fall. 3 yr. plants in 1 gal. cans, $1.25.
9420 TANGUTICA (H 8-10°)
A very lovely and interesting form of small flowered Clematis. The dainty golden yellow lantern shaped blooms appear in June and again in September. Long feathery stamens extend conspicuously from the center; remaining after the petals drop, in an attractive fluffy seed head. It is a small grower with slender stems; fine for small arbors and trellises, and for covering banks or retaining walls. 4" Pots, $1.25 each.

LARGE FLOWERS CLEMATIS
A partially shaded location is ideal for the large flowered Clematis. They thrive best in a rich loam of rather light texture. The soil should be slightly alkaline and must be well drained. The plants should be set with the collar of the plant at least 2 or 3 inches below the surface. A mulch of peat moss to keep the roots moist in summer, and protect them in winter is very helpful the first year.
9416 Jackmani (H 20°). A most popular variety—velvety violet purple.
9418 Mme. Edouard Andre (H 15-20°). Similar in habit and form of flower to Clematis Jackmani. Its color is rich crimson red and makes a very distinctive and glowing picture in the summer and early fall.
Either of above. 4-inch pots, $1.25 each.

EUONYMUS
9422 Colorata—jhjqU (H 1°). An evergreen creeper of unusual distinction. Compact form and luxuriant foliage make it the most highly prized ground cover. 2 yr. plants, 1-9, .90c ea.; 10-29, 79c ea.; 30-100, 71c ea.
9424 Radicans Vegeta (Evergreen Bittersweet) hjdqBEN (H 15°). Unequaled as a wall covering. Each $1.25.

HEDERA (20°) glocation
9425 Helix (English Ivy)—A striking and handsome climber or ground cover; excellent on north walls and under shrubs. Needs protection from the winter sun. 2½" pots, 35c; 4" pots, 65c each.
9426 HELIX BALTICA (Baltica Ivy)—The hardiest of the ivies. A small leaved variety that is excellent for north and west exposures. 2½" pots, 1-9, 35c ea.; 10-29, 31c ea.; 30-100, 28c ea. 4" pots 65c each.

HONEYSUCKLE (Vine)glocation
9430 Goldflame—An ever blooming honeysuckle of remarkable beauty. Admired by everyone who sees it. 2 yr. plants, 1-9, $1.00 ea.; 10-29, 89c ea.; 30-100, 79c ea.
9432 Halliana (Hall’s Japan Honeysuckle), Semi-evergreen ground cover or climber. Fragrant white and yellow flowers. 2 yr. plants, 1-9, 50c ea.; 10-29, 44c ea.; 30-100, 40c ea.

SILVER LACE VINE

WISTERIA jhBUKF
9438 Sinensis. The old favorite lavender blue variety. 2 yr. plants, Each, 90c.
9442

TREE WISTERIA
A Tree Wisteria in bloom is a lovely and most uncommon sight. The long flower clusters of purplish blue completely cover the tree during May. In formal gardens Tree Wisterias are especially valuable. On the lawn they develop into beautiful specimens. They are very long-lived, and increase in beauty with each successive season. $12.50 each

SHIPPING WEIGHTS FOR VINES
In 2½" pots, one only weighs 1 lb., add ½ lb. for each additional; in 4" pots, one only weighs 3 lbs., add 2 lbs. for each additional; in gallon cans, each 12 lbs., vines not in containers, one only weighs 2½ lbs., add 1 lb. for each additional.
Ornamental Shade Trees

NATURE'S OWN AIR CONDITIONERS
THE FIRST ESSENTIAL FOR LANDSCAPING THE HOME

Ash (Fraxinus)

9546 American White gjoyBNVW (H 60')
6-8' $2.00; 8-10', $2.50
9548 Green Ash gjoyBNVW (H 50')—Shapely round top with dark green foliage.
6-8' $2.00; 8-10', $2.50
9552 European Mountain Ash (Sorbus Aucuparia) gjoyBEUVW (H 45')—White flower clusters 5 inches across, followed by orange red berries.
5-6', $3.00; 6-8', $4.00.

MALE ASH TREES

The desirability of non-seed-bearing male trees is receiving greater acclaim each year. The absence of the seasonal litter of seeds and its resulting crop of troublesome seedlings is, in itself, justification for the widespread acceptance of these especially propagated shade trees. The foliage of male trees is more abundant, more glossy and luxurious than that of ordinary trees.

9554 MALE EXCELSIOR (Male trees especially propagated) gnytNPVW (H 75')—Grown from selected non-seeding parent stock. Its broad head and abundant glossy foliage make it one of the most desirable of all Ash trees.
5-6', $3.00; 6-8', $3.50; 8-10', $4.50.
9550 Male Green Ash gjoyBNVW (H 50-60')—Especially selected and propagated from non-seed-bearing male trees. It is a tall pyramidal tree with a rounded head. The vigorous habit and dense glossy foliage make these male trees noticeably superior in the garden.
6-8', $3.50; 8-10', $4.50; 10-12', $6.00.

BIRCH

9540 Cut-leaved Weeping Birch gjoyVW. The most beautiful weeping tree in existence. The snow white branches grow uniformly outward and upward from the straight central trunk which is also conspicuously white. A slender lacy veil is formed by the vertical hanging slender stems and deeply cut leaves. Very beautiful, hardy and clean. Plant very early to insure a good start. Special handling makes these trees available for February planting. The trunks of smooth barked trees such as Birch should be wrapped for the first year after planting.
5-6', $3.00; 7-8', $4.00.
9542 European White Birch (Betula Alba) gjmntyNRW—A tall distinctive white barked tree with upright form. The leaves are nearly round, but abruptly pointed.
7-8', $3.00.

CELTIS OCCIDENTALIS gjoyBSEVW

9560 Hackberry (H 40')—A valuable shade tree with widespread, somewhat pendulous branches. Forms a round-topped head with bright green leaves, turning yellow in the fall.
5-6', $2.00; 6-8', $3.00; 8-10', $4.00.

NURSERY STOCK

All trees and other nursery stock are priced f.o.b. Salt Lake City. Orders of deciduous nursery stock can be shipped at any time during the Spring so long as the plants are dormant. Early plantings give best results.

Express or Motor Freight recommended for all trees larger than 3-4 ft.
CRABS, FLOWERING (Malus) ąjtyBEVW

From the standpoint of good growth, foliage, flowers and fruits, they are more satisfactory than any other group of small flowering trees. Their hardiness and wide adaptability to soil and climatic conditions make them especially desirable in our mountain states.

9563 Arnoldiana (10')—One of the most compact in habit of all the crabs and among the earliest to bloom. The flower buds are carmine, opening to delicate blush white flowers in long gracefully drooping clusters. Waxy yellow fruits the size of a Cherry add a pleasing note.

9564 ATROSANGUEINA (12')—A small tree, picturesque in form, with deep purplish bark and purplish green foliage. The buds of deepest carmine open to pink and are followed by small reddish purple fruits.

9565 BECHTELS (H 12')—A very symetrically formed tree with silver grey bark and large, deeply veined leaves. Its large double pink flowers resemble small opened roses.

2-3' only, price, $1.50

9566 Dolga (H 15')—Large white flowers followed by a great crop of red crab apples. Fruit makes up into jelly of the finest flavor.

9568 Eleyi Purpurea (H 15')—One of the best, the tree produces a mass of red bloom against a purplish bronze foliage. Dark red fruit that makes fine jelly.

9570 Floribunda (H 12')—Comparatively spreading in form. The rich rose-pink buds open to masses of white.

9574 HOPPI (H 12')—When in bloom, the flowering crab Hoppi is a gorgeous mass of soft rose red single flowers. The tree is upright and uniform in habit, growing rapidly into a beautiful small tree. Its bright orange red fruits are pretty in the fall and are good for jelly.

9576 Red Silver (H 12')—Red from top to bottom in bark, tree leaf, and flower. The leaves have a cutleaf character and are maroon, red and silver in color.

Each of above Crabs, except Bechtes—5-6', $2.00.

CERCIS hjotyASW

9562 Canadensis (Redbud) (H 30')—Striking ornamental trees, loaded with a mass of pea-shaped pink blossoms in early spring before the leaves appear. 5-6', $3.00

ELM (Ulmus)

9584 Chinese or Siberian gijyNOVWX (H 40')—5-6', $1.50; 6-8', $2.00; 8-10', $3.00; 10-12', $4.00

9586 Camperdown (Umbrella Elm) gijyNVW (H 15')—Branches grow outward and downward. Four-year heads, on six foot standards. $4.50

9590 English gijyNSVW (H 75')—A noble rapid-growing tree, forming a dense head. 6-8', $3.00; 8-10', $4.00

9592 Moline gijyNSVW (H 75')—Columnar form. The older trees becoming more spreading. 6-8', $3.00; 8-10', $4.00; 10-12' $4.50

HORSE CHESTNUT

9596 White Flowering gijyBSVW (H 60')—The handsome European species; has magnificent spikes of white flowers borne in great profusion and sweetly scented. 7-8', $4.50

HAWTHORNE (Flowering) gijyBEVW

9600 Paul's Scarlet Double (H 15')—Flowers deep crimson-scarlet; very double, followed by large red berries borne freely. 3-4', $2.50; 5-6', $4.00; 7-8', $5.00

9598 English (Double Flowering) (15')—Large clusters of double white flowers appear in May. In late summer and fall the tree is aglow with many large bright red berries. 6-7', $4.50

GOLDEN RAIN TREE

9686 Koelreuteria Paniculata hktvBNOVW (H 25')—"Golden Rain Tree." Large golden clusters. 3-4', $2.00

LABURNUM hjtyBVW

9602 Vossi (Long Clustered Golden Chain)—Small tree with flowers of pure golden yellow formed like those of Wisteria. The long hanging clusters attain as much as eighteen inches in length. 5-6', $3.50

LINDEN (Tilia) (H 60') gijyBESVW

9604 American—Not available this season.

9605 CORDATA (Little Leaf Linden)—One of the finest shade and street trees. L. Cordata is very uniform in growth and has smaller leaves than either the American or European varieties. 7-8', $4.00 ea.

9606 European—Pyramidal shape, foliage similar to the American Linden; white flowers in June. 7-8', $3.50; 8-10', $4.50; 10-12', $6.00

LOCUST (Robina)

9616 Thornless Honey Locust gkmyNSVW (H 50')—Very small leaves, an ideal lawn tree. 8-10', $5.00

9610 Globe Locust gkmyNRVW (H 20')—Unusually attractive round-headed tree. 1 Yr. head, $5.00

9618 THORNLESS HONEY LOCUST MALE TREES gkmyNSVW (H 50')—Not available.
NUT TREES

BEAUTIFUL and FRUITFUL

9716 Almond Northern jkAUW (H 20')—Exceptionally hardy and productive bearing soft-shelled nuts of excellent quality.

4-5', $1.50; 5-6', $1.90

9720 Almond, Utah, I. X. L. jkAUW (H 20')—Smooth, soft-shelled nuts of excellent flavor. 4-5', $1.50; 5-6', $1.90

9724 Filbert, Barcelona — This is the leading commercial variety and one of the best croppers, producing large, round nuts. It needs one or more pollinators for best results. 3-4', $1.75

9727 Filbert, Daviana—Proven in medium sized trees of fine quality and is a fair bearer. Fine for pollinating Barcelona. 3-4', $1.75

9728 English Walnut—Hardy strain. 5-6', $4.00

9732 Walnut, Thomas Black giyAENVW (80') — Large nuts with large kernels which come out in halves. Has a distinctive walnut flavor. The tree is fast growing, upright, and begins bearing in five years. 5-6', $4.00

9735 Common Black Walnut—A sturdy tree for woodland or windbreak. 5-6', $2.50; 6-8', $3.00

9728 Almond, Utah, I. X. L. jkAUW (H 20')—Smooth, soft-shelled nuts of excellent quality.

4-5', $1.50; 5-6', $1.90

9720 Almond, Utah, I. X. L. jkAUW (H 20')—Smooth, soft-shelled nuts of excellent flavor. 4-5', $1.50; 5-6', $1.90

9724 Filbert, Barcelona — This is the leading commercial variety and one of the best croppers, producing large, round nuts. It needs one or more pollinators for best results. 3-4', $1.75

9727 Filbert, Daviana—Proven in medium sized trees of fine quality and is a fair bearer. Fine for pollinating Barcelona. 3-4', $1.75

9728 English Walnut—Hardy strain. 5-6', $4.00

9732 Walnut, Thomas Black giyAENVW (80') — Large nuts with large kernels which come out in halves. Has a distinctive walnut flavor. The tree is fast growing, upright, and begins bearing in five years. 5-6', $4.00

9735 Common Black Walnut—A sturdy tree for woodland or windbreak. 5-6', $2.50; 6-8', $3.00

The shiny black cherry fruits which follow the blossoms are preferred by the birds to other more valuable fruit.

May Day Tree comes from eastern Siberia and Manchuria where extreme hardness and vigor were developed. It is highly recommended where it has been grown from Massachusetts to South Dakota and Idaho. Plant May Day Tree for permanent glorious beauty.

PRUNUS (Flowering Cherries)

Not available this season.

PRUNUS FLOWERING PLUMS hktvBNSVW

9672 Newport (H 15')—Not available this season.

9676 Thundercloud—An outstanding new variety which, without question, has the best and darkest foliage of all the purple-leaved flowering plums and retains its deep coppery effect throughout the summer. Light pink single flowers cover the tree in the spring. 4-5', $2.00

9678 Triloba (Double Flowering Plum) (H 10')—Before leaves appear, the tree is a mass of double, pink blossoms. May be grown in bush form. 2-3', $1.50

SEED AND NURSERY SPECIALISTS 59

Linden European

9684 JAPONICA (Chinese Scholar Tree)—A symmetrical round-headed tree with dark green glossy foliage giving a moderately dense shade. It is particularly desirable in the garden because of its long drooping cream-colored panicles which appear in late July when most other woody plants are out of bloom. They are especially effective against a background of Spruce or Pine. 4-5', $2.50

WILLOW (Salix) giyAENVX

9700 Laurel Leaved Willow. Glossy, deep green leaves. 6-8', $2.50

9694 Matsudana (Hankow Willow) (H 35') Upright. 6-8', $2.50; 8-10', $3.50

9696 Pussy Willow (H 12') 5-6', $2.50

9690 Weeping Babylonian Willow (H 30') 6-8', $2.50; 8-10', $3.50

9698 Weeping Golden Willow (H 25') 5-6', $2.00; 6-8', $2.50; 8-10', $3.50

WISTERIA Tree form—see page 56.
P. W.'s FRUIT TREES
"Mountain Grown" for Greater Productivity
Apples

SUMMER VARIETIES

9750 EARLY REDBIRD—Claimed to be the earliest red apple in cultivation. Ripens a week earlier than Yellow Transparent, producing most palatable, glowing-scarlet-red apples—almost twice the size of Early Transparent. This apple, because of its size, flavor and cooking qualities, is surpassing the old favorite, Red Astrachan.

9757 SUMMER DELICIOUS—Apples of a size, shape, color and flavor similar to the popular Red Delicious are uncommon in July and August, the ripening time of summer Delicious. For home and local market its sweet aromatic flavor will be sought after for pies as well as for eating out of hand.

9756 YELLOW TRANSPARENT—One of the earliest. Apples pale yellow when ripe; good quality. Ripens in July.

Sizes of all summer Apples: 5/16-7/16, 7/16-9/16, 9/16-11/16.

AUTUMN VARIETIES

WINTER VARIETIES

9762 DELICIOUS—Solid red, most popular for eating, storing and shipping.

9764 Delicious—Yellow-gold. It bears young and heavily. The fruit is large, juicy. No other yellow apple is of better quality.

9766 JONATHAN—Solid red. Equal to Delicious in popularity. Very firm, richly flavored flesh.

9772 ROME BEAUTY—Solid red. It is a brilliant red apple, large, tender, juicy. The tree is hardy and bears heavy crops every year.

9774 Stayman Winesap—Smooth, greenish-yellow, splashed and striped with red and purple.

CRAB APPLES

9786 Siberian—Beautiful red. September. Highly esteemed for making jelly.

Sizes: 5/16-7/16, 7/16-9/16, 9/16-11/16.

Apricots

9790 Chinese—Large, round, deep orange-yellow fruits. Flesh is firm and the richest flavor. Late June.

9796 Moorpark—Very large, light yellow, oval shaped fruit: The tree is slightly harder than Chinese. Late June.

Sizes of both Apricots: 7/16-9/16, 9/16-11/16, 11/16-up.

Luscious Pears

Plant about 20 ft. apart each way

9850 BARTLETT—Fruit, large, clear yellow, highly flavored, very juicy. September.

Sizes: 5/16-7/16, 7/16-9/16, 9/16-11/16, 11/16-up.

9860 PARRISH FAVORITE—Large winter pear, ripening in November-December. Will keep until Spring, retaining its captivating flavor. Never blights.

Sizes: 5/16-7/16, 7/16-9/16, 9/16-11/16.

NECTARINES

The Nectarine has a smooth skin like the plum. It is like the peach in other ways and requires the same culture. Its pungent, sprightly flavor is reminiscent of both, but with an added deliciousness all its own. Set trees 16 to 18 feet apart.

9816 John Rivers—The hardiest Nectarine. Attractive size, red cheek and luscious green flesh.

Sizes: 7/16-9/16, 9/16-11/16, 11/16-up.

Cooling Shade or Beautiful Flowers

9642
HELEN BORCHERS
Pink double flowering Peach. A select strain with larger, deep pink flowers.
4-5', $1.75 each
Also available in the popular red flowered variety.

9644  RED Double-Flowering PEACH
For spectacular, far reaching beauty and for special garden accent points, gardeners wisely choose the Red Double-flowering Peach. It is a small tree (about 15 feet tall) of erect habit and moderately rapid growth.
5-6', $2.00 each

9624  NORWAY MAPLE
The always popular Norway Maple is a tree of uncommonly sturdy character. Its clean hardwood trunk and branches have an unmistakable air of permanence; the large deep green, notched leaves adding a dense, comforting shade. The Norway Maple grows tall with a beautiful, rounded head but when kept trimmed will make a more compact specimen. Its ability to thrive in almost any type of soil is recognized by gardeners everywhere.
6-8', $3.50; 8-10', $4.00; 10-12', $5.00

9550  MALE GREEN ASH
Because Male Green Ash is a non-seed-bearing tree all of its strength and energy go directly into the production of beauty and shade. Its leaves are more glossy and more profusely borne than those of the female tree. Tall, pyramidal in form with strong, hardwood branches, Male Green Ash is one of the most adaptable and permanent shade trees.
6-8', $3.75; 8-10', $4.50; 10-12', $6.00

9600  PAUL'S SCARLET HAWTHORN
In late Spring this shapely small tree is aglow with countless clusters of brilliant scarlet flowers. Large shiny red berries are attractive in the Fall.
5-6', $4.00
ITALIAN PRUNE

One of the most dependable profit producing fruits for the commercial grower and equally desirable in the home orchard.

Extra size (11 16" - up) $1.75
4-6' (9 16-11 16) $1.25
3-4' (7 16- 9 16) $1.10

RED DELICIOUS APPLE
(Courtesy Washington State Apple Commission)

RED DELICIOUS

America's most famous dessert apple. Extra large fruits, tender and truly "Delicious". It is always in demand on the markets and is a valuable asset to the home orchard.

4-6' (9/16-11/16) $1.25
3-4' (7/16- 9/16) $1.10
2-3' (5/16- 7/16) $.95

Quantity prices of apples will be found on page 60

HALEHAVEN

The "all-around" home and commercial peach. Halehaven produces large, beautiful fruit of excellent flavor and firm texture. It ripens about 17 days earlier than Elberta. Over the nation the number of trees planted annually is second only to Elberta.

Extra (11/16" - up) $1.75
4-6' (9 16-11 16) $1.25
3-4' (7 16- 9 16) $1.10

See page 64 for Quantity Prices
Fruit Trees continued
Sweet Cherries

Plant 30 feet apart; 49 per acre.

7/16-9/16; 9/16-11/16; 11/16-up

9802 LAMBERT—This follows Bing in ripening and is fully equal to it both as a commercial and home variety. Fruit very large, heart-shaped, firm flesh and a rich, sweet flavor. It is less subject to frost injury in blossom time than any other of the sweet varieties. Ripens in July.

7/16-9/16; 9/16-11/16; 11/16-up

9804 BLACK TARTARIAN—Large, purplish-black, sweet. Ripens first of July. Plant with Bing or Lambert for pollination.

9/16-11/16; 11/16-up

9806 Napoléon—Very large, pale yellow, red cheek.

11/16-up

9808 Windsor—Fruit large; heavy bearer; beautiful dark color, almost black. Good polliner for Bing or Lambert.

9/16-11/16

SOUR CHERRIES

Plant 20 feet apart each way; 108 per acre.

9812 ROYAL DUKE—Not available this year.

9812 MONTMORENCY—Improved. This strain produces much larger fruit than the old true Montmorency and has become the leading sour cherry for cold pack and canning; ripens late June to early July.

7/16-9/16; 9/16-11/16

HANSEN’S BUSH CHERRIES

Since the introduction of these new fruits they have become widely planted. Hardy, easy to grow, and early bearing, they adapt themselves to even the coldest climates. The fruit is good to eat fresh and will make the most delicious preserves. Plant them 3-4 feet apart in rows 6 feet apart for fruit production. When used as ornamental shrubs they are beautiful as specimens, groups or hedges. 2-3’, 75c each

Peaches

Plant 20-25 feet each way; 70-108 per acre.

9826 ELBERTA—A leading market variety, large, handsome, bright yellow overspread with crimson; juicy, fine shippers. Freestone.

9828 EARLY ELBERTA—About ten days earlier than regular Elberta, otherwise similar.

9834 J. H. HALE—Large orange-yellow; considered by many superior to Elberta. Freestone.

9836 Halehaven—Large reddish yellow, a cross between J. H. Hale and South Haven, combining the good qualities of each Ripens 17 days before Elberta.

9/16-11/16; 11/16-up

9831 SUMMER ELBERTA—A new and superior very early yellow-fleshed freestone Peach. Summer Elberta has the fundamental characteristics of the famous old Elberta but with a new richness of flavor, sweeter, juicier flesh and a more beautiful red colored skin. Excellent for canning, shipping and for eating fresh. Summer Elberta extends the home canning season and offers a real money making opportunity to commercial fruit growers. It ripens in July and early August when good quality Peaches bring the highest market price.

9840 Orange Cling—Very large; yellow with dark crimson cheek; flesh golden yellow.

Sizes of all peaches except Halehaven—

7/16-9/16; 9/16-11/16; 11/16-up

SEED AND NURSERY SPECIALISTS 63

Large, Top-Quality J. H. Hale Peaches
PLUMS and PRUNES

Plant about 20 feet apart each way, 108 trees per acre.

9870 Duarte—A rich blood-fleshed plum; similar to Satsuma. Tests show this tree is hardier and more productive.

9873 Elephant Heart—A huge, heart-shaped freestone plum with blood-red flesh and luscious flavor. Early September.

9872 Formora—Early, large, heart-shaped, cherry-red as it ripens, sweet and delicious. Early July.

9874 Green Gage—Large pale green fruits, rich flavored and juicy.

9886 Santa Rosa—One of the leading shippers. Good size, purplish red. Flesh reddish in color, juicy and delicious. Late July.

9890 Satsuma—A fine, large purplish crimson; pit small. Delicious flavor. July.

9898 ITALIAN FLEMBURG PRUNE—Large, oval, dark purple; flesh greenish yellow; separates freely from stone; best for drying. August-September. Best commercial sort, “Italian” is on peach root.

---

DWARF FRUIT TREES

Only a small space required for these fruitful and ornamental Dwarf Trees. Even a small yard can provide a wide variety of delicious fruit.

Early Bearing, usually the first or second year after planting gives most efficient use of garden space.

June to October—Popular demand for Dwarf Fruit Trees has guided us in the selection of this group of fine varieties, the largest we have ever offered. There is a fruit for every month from June to October.

9793 Dwarf Apricot Perfection (June)
9799 " Cherry Bing (July)
9889 " Plum Satsuma (July)
9835 " Peach Halehaven (August)
9869 " Pear Bartlett (September)
9868 " Apple Red Delicious (October)

All are husky 2-year-old Trees

1 to 9 of one variety $3.00 each
10 to 49 of one variety $2.72 each
f.o.b. Salt Lake City

Small Fruit Plants
A Small Cost for Big Savings

BLACKBERRIES

9900 Early Harvest—Berries uniform, glossy black, very early.
9906 Lucretia Dewberries—Fruit very large, superb quality.
Price 1 to 9 plants, 15c ea.; 10 to 29, 12c; 30 to 249, 10c; 250 to 1000, 9c

BOYSENBERRY

9912 Boysenberry Thornless (See illustration on opposite page)—Boysenberry is superior to all other vine berries in flavor, color, size and productiveness. When canned fresh or in jam they have a distinctive luscious flavor. The thornless strain offered here is especially desirable for the home garden.

1 to 9 plants, 40 c ea.; 10 to 29, 35c; 30 to 249, 28c; 250-1000, 25c.
**Small Fruit Plants Cont.**

**STRAWBERRIES**

All Strawberry plants will be sent either Parcel Post or Express, according to quantity. Put up uniformly in bunches, 25 plants each.

- **9990 Marshall**—As a large berry for home use, it is peerless. The color is a rich, glossy crimson.
- **9992 Mastodon Everbearing**—Large luscious and deep red.
- **9997 UTAH CENTENNIAL**—This strawberry is such an outstanding new variety that we have illustrated it in full color on the inside back cover. Photographic and printing processes, however, cannot reproduce its true character—it's superior size and color, and particularly its amazing productivity and wonderful flavor. Not until you have grown and eaten the fruit will you fully realize the superiority of Utah Centennial.

Strawberries sold only in bundles of approximately 25 plants each.

**CURRANTS**

- **9920 PERFECTION**—Large, bright red; most popular new variety. Large 2-year-old roots.
  - Price: 1 to 9 plants, 50c ea.; 10 to 24, 40c; 25 to 249, 34c.

**GOOSEBERRIES**

- **9930 Champion**—Medium size red fruits. Good yielder.
- **9934 Haughton**—Good quality fruits either green or ripe. Medium size and pale red when ripe.
  - Either of above: 1 to 9 plants, 65c each; 10 to 29, 55c ea.; 30 to 249, 50c ea.; 250 to 1000, 45c ea.

**RASPBERRIES** (Red Varieties)

- **9970 Latham**—This remarkable and very desirable variety is certified absolutely mosiac-free, and acceptable anywhere; berries are large and round, with profitable shipping firmness; color, a brilliant red.
  - Prices: 10 to 24 plants, 15c ea.; 25 to 49, 12c ea.; 50 to 249, 10c; 250 to 1000, 8c.
- **9974 P. W.'s Colossus Everbearing**—The finest red everbearing raspberry. The fruits are very large, firm, and of excellent flavor and color making them particularly valuable for table use, for canning and for frozen food locker storage.
  - Commercial growers show good profits with Colossus.

**INDIAN SUMMER**—Another everbearing Raspberry of superior quality. The fruits are large, round-conic, medium red and excellent flavor. The vigorous plants (above medium height) bear heavy crops; the first ripening soon after the June varieties and the second, beginning in September and continuing until severe frost. Especially recommended for the home garden.

**Taylor**—The most promising new red variety. Hardy, vigorous, tall, and very productive. The fruits are large, oblong, bright red and ripen a little earlier than Latham.
  - Price, all Red Raspberries except Latham: 10 to 24 plants, @ 23c each; 25 to 49, 17c ea.; 50 to 249, 15c ea.; 250 to 1000, 12c ea.

**BLACK AND PURPLE RASPBERRIES**

**9980 Bristol** (Black)—The berries are large, firm, fairly glossy and of excellent quality, ripening 3 to 4 days earlier than Cumberland.

**9984 Sodus** (Purple)—New and very promising. The plants are very vigorous, very productive, hardy, drought resistant and yield a good crop every year. The fruits, which ripen shortly after Latham are very large, firm, medium purple in color, sprightly and good in quality.
  - Either: 10 to 24 plants, @ 19c each; 25 to 49, 15c ea.; 50 to 249, 12c ea.; 250 to 1000, 10c ea.
HYBRID FIELD CORN

Sow in drills 3 feet apart, using approximately 15 pounds of seed per acre.

2502 PORT-WALCO HYBRID NO. 100

The New Leader

Without a peer in a Medium Maturing Hybrid for the particular Farmer. Since its introduction growers in most areas have reported heaviest tonnage per acre in both green fodder and in dry weight with Port-Walco Hybrid 100. Maturity 5 to 7 days earlier than the old U. S. 52 allows a wider range of planting. It is a prodigious yielder of good solid corn under a wide range of soils and climatic conditions. The ears are long and thick with very little taper which makes for a large yield in grain. It is a strong and vigorous grower, producing tall succulent stocks. Then too, the ears are set at a good height, so there is little or no stalk breakage. You will be liberally rewarded for planting a good acreage of this splendid new variety.

2505 PORT-WALCO HYBRID NO. 90

The newly proven leader in the 90-day maturity class. The dark green colored plants of this high yielding early hybrid retain their rich color even after the ears are well matured. This condition makes possible a feed of greatest nutritive value, having at the same time the advantage of higher palatability. The ears are medium size and thick, with deep kernels. Our tests of No. 90 prove it to be the heaviest grain and fodder yielding variety among those of the same maturity date.

2507 PORT-WALCO HYBRID NO. 120

The outstanding silage variety, maturing in from 110 to 120 days. Not only is it the heaviest fodder producer in our hybrid list, but it produces an equally good grain crop. Its short shanks permit easy harvesting and handling for silage purposes. The plants of No. 120 are rich dark green, retaining their color until after the ears are well matured. As silage, it possesses both higher food value and higher palatability. We recommend No. 120 as superior to U. S. 52 for silage.

2508 MINHYBRID - No. 301

This new hybrid has proven its value in trial plantings in all the principle Corn growing sections of Utah during the past 3 years. High recommendations come from both the U.S.A.C. Extension Service and from farmers who made plantings. Minhybrid 301 matures ten days to two weeks earlier than the U. S. 52 sold by us for several years, but which is now practically non-existent. In addition it does not grow so tall, producing less green weight to handle but retaining a total dry weight equal or nearly equal to that of U. S. 52.

For areas where the growing season is short we recommend Minhybrid 301 because of its earliness and high productivity.

FOR GREATER YIELDS ON FEWER ACRES WITH LESS HELP

Hybrids are superior because of their resistance to drought, uniformity of growth, stiffness of stalks and increased yields, amounting to as much as 25%.

STANDARD OPEN POLLINATED CORNS

2510 Australian White Flint—Heaviest yielding of the Flints, and one of the earliest, maturing in about 75 days. Stalks of medium height bear large 12 row ears.

2512 Minnesota No. 13—The leading all-around open pollinated variety. A 90-day Yellow Dent corn, acclimated to this area. It is the heaviest producer of the medium early corns. Plants grow 7 to 8 ft. tall, bearing ears 9 to 10 inches long. Kernels are medium depth and 16 to 18 rows per ear. Yields average about 90 bushels per acre. Makes splendid ensilage.

2518 Pride of the North—Matures in 80 to 90 days. A tall-growing Yellow Dent with luxuriant foliage, and vigorous grower. Ripens early, yielding 75 to 85 bushels per acre. Very fine ensilage as well as for dry corn.

2520 Improved Leaming—100-110 days. It will grow more tonnage to the acre than any other open pollinated variety we know. Leaming makes a very heavy foliage, making it especially good for silage purposes. The ears and kernels are a little larger than Minnesota 13. Produces good yields of grain.

FIELD SEED PRICES

Prices on all field seeds are quoted on page 72. Since the market changes rapidly on Field Seeds, the prices quoted herein are subject to change without notice. All quotations are f.o.b. Salt Lake City, Utah.
SMALL GRAINS & FORAGE CROPS

Millet

2890 Early Fortune or Red Hog—This seed is of a shiny reddish brown. The heads are compact. It is ready to harvest in 50 to 60 days.

2892 Golden or German—This is one of the best varieties for hay and fodder. It makes rapid, vigorous growth, often yielding 3 to 5 tons of hay per acre, on good rich soil. It grows 4 to 5 feet high, is of rather coarse appearance, and should be cut for hay before it is in full bloom. At this stage, the hay is of the best quality.

2894 Yellow Hog—This is the most popular of the Proso type Millets, very valuable for late planting and as an emergency crop after others have failed. Hog Millet is a grain crop; but has the advantage of the grain ripening while the stems are still green, which if cut at the proper time can be threshed for grain while the hay is of a good quality for feeding purposes.

Dry Land Grain Sorghums

2920 60-Day Milo (Dwarf or Combine Strain)—Is a Sorghum similar to Kaffir Corn but shorter. Grows erect with thick, close-jointed stalks 2 or 3 feet tall. The large heads give a heavy yield of grain. It is drought-resistant and does well on alkaline soils.

Sweet Sorghums

2924 Atlas Sorgo—Is one of the highest yielding forage crops grown. Produces as much as 25 tons of silage per acre, extremely drought-resistant, and is relished by livestock. It produces a long, leafy stalk, sweet and juicy, with a good grain head.

2928 Black Amber Cane—80 to 100 days. Is the best known Sorgo and in many sections is the favorite because it is the earliest.

Sunflower

2930 Grey Stripe—A good silage crop for dry land. They may be sown early or late as they grow rapidly. The silage is very palatable and has high feeding value. Cultivate and handle similar to corn. Plant 5 to 6 lbs per acre.

Rape

2900 Dwarf Essex—Pasture for hogs, sheep, and poultry. Sow 10 lbs. per acre. There is need for an extra thick growing green forage crop for use any time during the fall, winter, and spring, and our Dwarf Essex Rape fills that need exactly.

1180 KOCHIA—This hardy annual has been recently recommended as an excellent dry land forage producer. The foliage is similar in appearance to that of Juniper evergreens but is soft and very palatable. The plant, about 15 to 24 inches tall, is densely bushy producing an abundance of feed. Kochia is extremely drought resistant and will grow on any type of soil. It usually reseeds itself and maintains a good stand of plants for several years. Sow at the rate of 2 to 3 pounds per acre.

Barley

2522 Trebi (certified)—An excellent feed variety, recommended for the lands of the Rocky Mountain area, heavy yielder. Where grown under irrigation, it qualifies as a malt barley.

2524 Velvon (certified)—A hardy type released for planting in 1937. It is highly resistant to covered smut and has a smooth awn, which greatly increases its value as feed. Velvon has the desired large, plump, white-colored kernels, the yield generally surpassing other varieties.

Oats

2534 Bannock Oats—A highly smut resistant variety developed by the Idaho Experiment Station. An exceptionally high yielder having a large, plump, white kernel. Because the straw is stiff and slightly shorter than other varieties Bannock is very desirable where lodging is a problem.

2530 Swedish Select—The grain is plump, white, and very heavy. The quality of the oats produced in the Rocky Mountains is unsurpassed.

Spring Wheat

2550 Dicklow—is a late maturing spring wheat. The kernels are soft and somewhat flattened. It has out-yielded all other varieties except Federation on the irrigated lands of Southern Idaho and Northern Utah. This grain is in demand by millers for making biscuit and pastry flour.

2552 Federation—Is a short, fairly early spring wheat. The kernels are white, rather short, and usually soft. It has replaced almost all other spring varieties.

2554 Lemhi—A variety which is rapidly replacing Dicklow. Its superiority is due to the fact that it has the milling quality of Dicklow combined with the stiff straw and high yielding ability of Federation. Lemhi will not lodge nor shatter as easily as other Spring Wheats.

A Field of Lemhi Wheat
CLOVER FOR MEADOWS AND PASTURES

2600 Alsike—Is recommended both for sowing with Timothy and also with the Red and Mammoth Clovers, as well as a hay crop by itself. It does not winter-kill. The use of Alsike Clover is increasing rapidly; cattle prefer it to other clovers. It is very fine for honey bees. Sow at the rate of six or eight pounds per acre; sown in mixtures, 3 or 6 pounds per acre is sufficient. Does best on damp soils—used in pasture mixture with grasses.

2610 Hubam Clover (Richest honey producing clover)—This is an annual sweet clover which grows rapidly, attaining a height of 6-7 feet. It is very valuable for pasturage and hay when cut before it gets too old. As the flowers are rich in honey, it makes very good bee pasturage. It is also used to great advantage as a cover crop or for green manure. It should be planted in Fall or Spring. Sow 12-15 pounds per acre.

2620 Ladino Clover is regarded as a large form of the common White Dutch Clover and like the latter is a long-lived perennial. Its growth, however, is larger and more luxuriant. When the leaf growth has been grazed off, new leaves develop quickly, complete recovery occurring in 17 to 28 days. It is strictly a crop for irrigation. Sow in Fall or Spring at the rate of 7 to 8 lbs. per acre.

2630 Medium Red (Trifolium Pratense)—Is a dependable, all-around variety for farmers and stockmen. It makes two hay crops each year. Sow either in the Spring or Fall at the rate of 15 pounds to the acre. It is good in pastures either alone or with some grass as a companion crop. It is replacing alfalfa in heavy wilt-infested areas.

2640 Strawberry Clover (Tall Variety)—It is similar to Ladino but has proved to be much hardier. The flower resembles White Dutch Clover, but is pink. The foliage is similar to White Clover, having creeping runners, strawberry fashion, establishing new plants wherever the nodes contact the soil. It has proved particularly adaptable to alkaline and wet soils. Several observations have been made of this clover growing in fields of salt grass pasture. It is much in demand as a pasture crop because of its palatability. Livestock relish it and pass up other clovers and grasses wherever Strawberry Clover is available. Sow 4-6 pounds per acre.

2650 White Dutch Clover—Is a long-lived perennial legume, spreading by creeping stems that root at the nodes. When grown in mixtures with grass it increases the carrying capacity of the pasture and provides a nutritious acid palatable feed. White Clover, like all other clovers, thrives best under cool moist growing conditions.

Extra Values From Pastures

Pasture forage is not only the cheapest and best roughage for efficiency of milk production, but it also gives to milk certain additional qualities. Milk produced on pasture herbage is especially high in vitamins A, C and E. This milk also has a more favorable balance between its basic and acid salts. The highest score butter is made during the pasture season and cheese made from milk produced on pasture is likewise superior.

The finer flavor and aroma producing bacteria are stimulated in growth by the food elements supplied by green forage.

SWEET CLOVER

2660 White Blossom (Melilotus Alba)—Its value in the redemption of alkali lands cannot be over-estimated. It grows in a variety of soils—heavy, light, wet or dry, almost anywhere except in acid soil. Sow 10 to 14 pounds per acre. It is often used for a green manure crop because of its quick prolific growth.

2666 Yellow Blossom (Melilotus Officinalis)—It is finer in the stalk and more palatable when mature than White Blossom Sweet, and has the same soil adaptation. Its refinement of stalk and palatability make it a good pasture and hay crop.

OTHER HAY & COVER CROPS

Field peas

2880 Canadian Field—They enrich the soil and are splendid stock feed. For hay, they should be cut while the milk is in the vine forming the pod. Plant early in the spring at the rate of 100-120 pounds per acre or 60 pounds with a nurse crop of Oats or Spring Rye.

Soy Beans

2911 Chief—It is outstanding for all purposes—hay, feed, hogging down, as well as for planting with corn for the silo. Excellent yields of hay or a large crop of beans. A good average crop will produce 20 to 30 bushels of beans per acre. Chief is a robust grower of vines which stand up well and are easily cut with corn or grain binder. This variety matures in about 100 days.

Vetch

2940 Common—Is grown as a hay and seed crop, as well as for green manure, silage, and pasturage. It should be used far more extensively for orchardists as a cover and green manure crop. Sow 60-80 pounds per acre.

A well-managed pasture for dairy cows

PORTER-WALTON CO.
IS YOUR PASTURE EARNING $200 PER ACRE?

You can increase the production of the average pasture 100% by application of the following U.S.D.A. pasture management rules.

1. Fall plow land and work down in spring in firm, moist condition.
2. Use only clean seed of high germination.
3. Sow the seed to a depth of 1/2 to 3/4 inches (drilling is preferred).
4. It is safer not to use a nurse crop. If one is used, we recommend Barley at 40 to 50 pounds per acre.
5. Keep young plants well irrigated.
6. Do not graze the first year until mid-July or later.
7. Avoid over-grazing by dividing pasture land into several practical sections and follow a rotation system of grazing.
8. Pastures should be fertilized with 100 to 150 pounds of phosphate per acre every other year and 10 tons of manure per acre every third year.
9. Pastures should be harrowed both ways in early spring and late fall when droppings are soaked to prevent bunching of unpalatable forage the next year.
10. When bunches of unpalatable forage and weeds appear, pastures should be clipped with a mower.
11. Properly irrigated pastures need not consume more water than other irrigated crops.

2560 Hardy Desert—This splendid variety is the selection from the far famed Utah Dry Land type, which is a "Northern or hardy strain." Its roots pierce the soil until moisture is reached, even a depth of twenty or thirty feet has been traced in some dry localities. It produces even under adverse conditions but in favorable situations under irrigation, it is a prodigious yielder. Very desirable, also, as a rotation crop since it supplies the much-needed nitrogen and humus. Sow 10 to 15 pounds per acre.

2570 Utah Pioneer—Placed under certification in 1938. It was selected from two parent fields in Millard County which are known to be at least 60 years old without reseeding or breaking up. Preliminary experimental tests point to its resistance to wilt over Grimm or Common and other hardy varieties.

2580 Grimm—This variety is especially recommended for shallow soils, those underlaid with hardpan, or where the water table is near the surface. The stems and leaves are of somewhat finer and leafier quality than common Alfalfa. It is susceptible to bacterial wilt and is not recommended for areas of severe infestation.

2590 Ladak—Tests at nearly every Northern and Western Experiment Station show Ladak leading on tonnage, long life, drought-resistance, and winter hardiness. It has also shown marked resistance to bacterial wilt. Ladak makes an exceptionally heavy first and second crop but little third.

2575 Argentine—Imported seed from South America similar to the common Utah strain.

See page 72 for prices

PASTURE PALATABILITY

The most recent trend of study and experimentation with dairy pastures has made possible the classification of various grasses and legumes according to their palatability.

Close observations of 36 different mixtures in one field, revealed which species were most readily grazed. A very important fact is that as soon as the most palatable forage was entirely consumed milk production declined, even though quantities of highly productive but less palatable grasses and legumes were still available.

Our new pasture mixtures are designed to produce more palatable forage and thereby maintain milk production at a more constant level.

Highest yields of forage as well as of milk are produced on pastures where a rotation system of grazing is followed.
Grass

For Range, Meadow and Pasture

2700 Mountain Brome
(Bromus Marginatus)

This stout perennial bunch grass is very common between the altitudes of about 5,000 and 10,000 feet. It has a very wide range of soil adaptations, varying from fairly moist loamy soils, where the best growth is made, to fairly dry, gravelly soils. Mountain Brome Grass, when young, is grazed closely by all classes of livestock. Where it can be cut for hay, it makes a very fine feed for horses and cattle.

It is an exceptional grass for the reclamation of land inaccessible to farm machinery, as good stands may be obtained by broadcasting on areas where seedbed preparation is not possible. Sow either Spring or Fall at the rate of 10 to 20 pounds per acre.

2740 Meadow Fescue
(Festuca A. Arundinacea)

An excellent grass for pasture when planted alone or in combination with other grasses and clovers. It is a tufted, deep rooted, long-lived perennial, growing to a height of 15 to 30 inches. The leaves are bright green and very succulent, supplying palatable forage from early spring until in the late fall. Yields average two tons per acre. Sow in the Spring or Fall at the rate of 20 to 30 pounds per acre.

2735 Alta Fescue
(Festuca E. Arundinacea)

Alta Fescue is one of the most outstanding grasses of recently developed varieties for pasture and hay purposes. It is much more productive and palatable than Meadow Fescue. Alta Fescue grows late in the summer and fall when other grasses have passed their productive peak. Various trials which have been conducted show it to outyield other varieties from 15 to 50%. The exceptionally dense root system reaching a depth of 3 to 6 feet, makes this variety exceptionally valuable as a soil builder where the humus content is low. High palatability at all pasturage stages, remarkable production, and its ability to crowd out undesirable weed growth make Alta Fescue one of our most valuable forage grasses. Sow in late fall or early spring at the rate of 12 to 15 pounds per acre.

2750 Orchard Grass
(Dactylis glomerata)

This very early pasture grass, furnishes feed at least three weeks before most other grasses. Even after close grazing, a ten-day interval is sufficient for another growth. It makes a heavy sod and gives splendid pasture until late in the Fall. Withstands drought and is very hardy. It grows in tufts and can be sown, if desired, with Red Clover and Alfalfa. When planted alone, sow at the rate of 20-25 pounds per acre.

2780 Crested Wheat Grass
(Agropyron cristatum)

It is wonderful ranch and range grass which grows earlier in the Spring and later in the Fall because of its ability to grow at lower temperatures. As a hay crop, it is very highly nutritious and palatable, stands well under grazing. It has made a most remarkable showing under dry, arid conditions, succeeding where many other varieties fail. Crested Wheat is a long-lived grass. Fields 20 years old are still doing well. It is relished by livestock and adapts itself to a wide range of soils. For hay and pasture, sow 10 pounds per acre.

ABOUT PRICES

All field seed prices are quoted on Page 72. The prices quoted herein are subject to market changes. You are safe, however, in sending remittance according to these prices. In case of decline the difference will be promptly refunded; if there has been an advance, you will be notified for your confirmation before shipment is made.

70 PORTER-WALTON CO.
Critically Grown Seed of Highest Germination

2850 Tall Meadow Oat Grass

Tall Meadow Oat is a long-lived, deep-rooted and drought-resistant perennial grass. It produces an abundance of very palatable forage. Recent pasture grass experiments conducted by U.S.A.C. at Logan prove this grass to be one of the most desirable from the standpoint of productivity and palatability; comparing very favorably with Smooth Brome. Tall Meadow Oat Grass gives best results for pasture when sown in a mixture with other grasses and clover. It stands grazing well, furnishing an abundance of early spring pasturage and remains productive until late autumn.

2860 Timothy

Of hay grasses, Timothy leads all. Thrives on clay or heavy loams, wet or boggy soils, or in mountainous districts. At higher elevations where fewer grasses and clovers are adaptable, Timothy is the most important hay and pasture crop. Alone, sow 12 pounds to the acre, or with clover, 10 pounds Timothy and 6 pounds clover.

2870 Western Alkali Grass

This grass will produce an excellent crop of hay or furnish an abundance of palatable forage on alkali ground that will produce no other crop. It will withstand an unlimited amount of water in the spring and successfully withstands drought during the summer. Western Alkali Grass is a perennial and does not freeze during the winter, making available forage at all times. Seeding may be done from September until early spring. Most successful stands are obtained by broadcasting upon the snow at the rate of 2 pounds per acre.

2810 Slender Wheat Grass

This is a native North American bunch grass, which has proved very valuable under cultivation. It is a bunch forming variety, being better adapted to range land than meadows; however, recent tests are proving its value as a grass for alkali soils. It is recommended for pastures in canyons or flats, succeeding exceptionally well at high elevations. It grows in dry, arid sections, producing numerous slender, erect stems, two to four feet high, with narrow flat leaves. Sow either Fall or Spring at the rate of 5 to 15 pounds per acre.

2820 Western Wheat Grass

(Agropyron Smithi)

This is a variety of great promise for the western arid regions. It is erect in growth and forms a firm solid turf even where moisture is very limited. It produces a uniform turf which makes it most suitable for fairways, roadside planting, and erosion control as well as an excellent range grass where rainfall is light. It supplies a long-felt need for a suitable sod-forming variety that will stand dry situations.

2830 Red Top

A valuable grass for moist soils. It makes a good permanent stand and is well adapted to pastures. It has been grown very successfully on alkali and bottom land where many other grasses have failed. It is also used as a lawn grass as it makes a fine stem and good turf. Sow 15-25 pounds per acre.

2934 Sudan Grass (Common)

Drill 15 to 20 lbs. or broadcast 25 lbs. per acre for pasture. It will endure much alkali. Planted in rich soil in June, it will be ready to pasture in 30 days. It will furnish grazing for two cows per acre throughout the summer. As a hay crop, it should be cut when heads appear. It takes several days of ideal weather to cure. A second crop may be cut or pastured if preferred. All kinds of livestock relish Sudan Grass—it has a sweet taste.

2935 New Sweet Sudan Grass

This new variety is a development resulting from several years breeding work by the Texas Agricultural Experiment Station in cooperation with the Bureau of Plant Industry, U. S. Department of Agriculture. It is sweet, juicy and more palatable to livestock. This was demonstrated consistently during the years the breeding and selection were progressing. When planted side by side with Common Sudan, the cattle kept the Sweet Sudan grazed to the ground, while the Common Sudan was grazed down to the height of about one foot. In all cases the Sweet Sudan was eaten first. Sweet Sudan is later in maturity than common Sudan thereby producing more vegetative growth and remaining green and growing longer than the common. After the crop reaches maturity the stalks and stems are still eaten readily. Sweet Sudan has more and broader leaves; heavier and taller stalks and stolts much heavier than Common Sudan.
### ALL FIELD SEED PRICES

**IMPORTANT:** All field seed prices are subject to market changes. You are safe, however, in sending remittance based on these prices. In case of decline the difference will be promptly refunded. When an advance has been necessary you will be notified for your confirmation before shipment is made.

For 5 to 9 pounds add 1¢ per pound to the 10 pound rate.

For 4 to 4 pounds add 3¢ per pound to the 10 pound rate.

#### SUPPLEMENT TO SUMMER PASTURE

We suggest planting extra acreage of green fodder corn for a food supplement during hot dry weather when pastures are not producing sufficiently. The larger remaining part of the crop matured and prepared as ensilage of course has the greater amount of actual food value for winter feeding.

For Larger and Better Yields

Plant the record making new **"PORT-WALCO No. 100"**

#### 3575 NEW IMPROVED CERESAN

This economical ethyl mercury phosphate dry disinfectant usually controls certain smuts and other diseases carried on seed barley, oats, rye, wheat, sorghums, millets, flax, peas.

4 oz. can $ .33
1 lb. can $ .90
4 lb. can $ 3.00
40 lb. pail 26.40

1/2 ounce treats a bushel
AMMONIUM SULPHATE

A quick acting, easily soluble fertilizer containing 20% nitrogen. It stimulates top growth and manufactures plant cells. Besides being the main fertilizer for celery, it is used extensively on sugar beets and other vegetables, also for berries and trees. On mature peaches, apricot, pear, and plum trees apply 3 to 4 pounds per tree. On Apple and Cherry apply 5 to 6 pounds per tree. Proportionately smaller applications should be made on trees that are not mature. 100 lb. bags, $3.00 each; 10 lbs., 50c; 25 lbs., $1.00.

BONE MEAL

Bone Meal, one of the favorite fertilizers for Fall garden feeding is again available. The plant nourishing elements (Nitrogen and Phosphorous) are liberated slowly making food available for a long period of time. 10 lb., $1.00; 25 lbs., $2.00; 100 lbs., $7.25.

GREENLEAF

The effective control for "Plant Yellows" or Chlorosis which is caused by certain chemical deficiencies in the soil.

GREENLEAF WORKS AT THE ROOT OF THE TROUBLE

When treating roses and shrubs and Evergreens apply from 1/4 to 1/2 lb. per plant. For trees use 1 lb. per inch of diameter through the trunk. 10 lbs., $1.00; 25 lbs., $2.00; 100 lbs., $7.00.

IRON SULPHATE

Iron Sulphate is a good corrective for alkaline soils. 4045 Crystals for plants, shrubs, trees. 4047 Snow Form for lawns.

NEW ORTHO COMPOST MAKER

Now, You can make rich natural fertilizer from grass clippings, leaves, weeds, kitchen waste, straw, etc. Compost is just the kind of fertilizer needed by most soils because it is based on humus. Ortho Compost Maker adds plant food elements to the natural material you already have and makes it ready to use in one-fourth the normal time.

5 lb. Bag (Enough for 300 lbs. of Compost) 85c.

PEAT MOSS

4085 Peat Moss is one of the most efficient means of adding humus to the soil. It creates a loamy condition which aids the penetration of air and water.

TERRA-LITE

(100% Vermiculite)

SOIL CONDITIONER—Loosens soil—Permits Aeration, Retains moisture—prevents soil baking.

MULCH—Winter or Summer—Insulates against heat or cold. Reduces need for watering and cultivation.

GROWING MEDIUM—Starts seedlings and cuttings quicker and better. Makes fibrous roots.

BULB STORAGE—Holds uniform humidity and temperature. Bury bulbs, tubers or vegetables roots in Terra-Lite.

SEED AND NURSERY SPECIALISTS  73
DDT waits for insects—Kills 'em when they come

3275 PEST-B-GON DDT SPRAY
Contains 20% DDT, the new insecticide that played such an important role in World War II. Use in the garden and also around barns, poultry houses, dog kennels, outbuildings, basements, against many beetles, worms, thrips, leaf hoppers, weevils—Ants, fleas, mosquitoes and certain other insects. A "MUST" for the modern home.

Use as directed.
4 oz. bottle, 65c; 1 pint, $2.00.

3293 PEST-B-GON DUST
An outstanding garden dust containing 10% DDT. A most popular insect control for the home gardener.
10 oz. Duster 60c; 2 lb. package, $1.00

3283 KNOX-OUT INSECT SPRAY
A double action space and residual spray for the household use containing 5% DDT, plus several knockdown insecticides. Kills many insects on contact and leaves a residue that will kill flies, mosquitoes, roaches, ants, moths and many other household insect pests for periods of from a few weeks up to three months.
1 pint, 35c; 1 quart, 65c; 1 gallon, $2.35.

3250 EXTRAX INSECT SPRAY
Kills by contact. Used against many sucking and chewing insects such as Aphids, Beetles, Caterpillars, Thrips, on Vegetables and Ornamentals. Easy to play that, General dosage is one teaspoonful to a gallon of water.
4 oz. bottle, $1.00; 1 pint, $2.85; ½ gal. $9.25

3255 ROTENONE GARDEN SPRAY (NNOR)
A liquid rotenone concentrate. It penetrates the waxy or hairy covering on the insect's body, bringing the tremendous power of Rotenone Garden Spray into action. Kills most common garden bugs of both chewing and sucking types. 1 oz. (makes up to 6 gal. of spray); 35c; 6 oz., $1.00; 16 oz., $2.15; 1 gal., $13.50

FUNGICIDES

3435 GREENOL Liquid Fungicide. A copper fungicide used to prevent Powdery Mildew. Contains spreading and wetting agents and mixes with EXTRAX Insect Spray for making a combination treatment against insects and diseases.
1 oz. 35c; 4-oz. bottle, 60c; 1 pint, $1.50; ½ gal., $5.00.

3285 KNOX-OUT GARDEN DUST
A Dust containing 5% DDT for the control of many of the insects infesting home gardens. Effective in the control of corn earworms, potato beetle, cabbage worm, thrips, and other common garden pests.
1 lb. pkg., 30c; 3 lb. pkg. 70c.

3290 DURA DUST NO. 50
(50% Wettable DDT)
The all around DDT product for farm and garden. Use on livestock, barns, stables, and crops. Frees your cattle from stable flies and lice; your buildings from mosquitoes, flies, bedbugs, spiders, etc., and protects your garden and crops from numerous insects.
1 lb. carton 90c
4 lb. bag $2.25
40 lb. bag $21.50

OIL SPRAYS

3440 VOLK Oil Spray. Envelops, wets and smothers many sucking insects, such as certain Scale Insects, White Fly, Mealybug and Red Spider. Also a spray carrier for other sprays.
4 oz. bottle, 35c;
1 pint bottle, 70c;
½ gal. can, $1.45;
1 gal. can, $2.85.

3400 LEAD ARSENATE
A stomach poison for use as a spray or dust to control chewing insects such as certain Beetles, Caterpillars, (as Oak Moth), Worms on Apples, Pears and other plants and Sod Webworm in lawns.
1 lb., 50c; 4 lbs., $1.30.

3385 APPO CUTWORM BAIT
A poisoned apple bait containing a high percentage of apple pomace. Especially effective in controlling cutworms and strawberry root weevil, also useful against snails, slugs, and earwigs. Easy to apply, long lasting effect.
1 lb., 45c.

MULTI-PURPOSE DUST
3303 Botano Garden Dust. For use against many insects and diseases. Preferred by many, particularly for vegetables. One of the safest multi-purpose dusts that can be used. 10-oz. size is Dual Purpose package which also serves as handy garden duster. (Contains ROTEN-ONE.) 10-oz. Duster 59c.

3317 ORTHO ROSE DUST
Although this complete modern pesticide is designed especially to combat the insects and diseases which attack rose plants it offers an excellent control for most chewing and sucking insects and plant diseases in the general flower garden.
8 oz. Duster pkg., $1.00.

3428 Garden Sulphur. Finely powdered . . . Used either as a dust or spray to control Powdery Mildew, Scab and certain other diseases. 26 oz., 35c; 4 lb., 60c.

3385 APPO CUTWORM BAIT
A poisoned apple bait containing a high percentage of apple pomace. Especially effective in controlling cutworms and strawberry root weevil, also useful against snails, slugs, and earwigs. Easy to apply, long lasting effect.
1 lb., 45c.

ANT CONTROL

Four to 8 Dispensers are enough for average home. Easy to refill. Ants feed from "WICK" . . . Can't get inside. For Argentine and Sweets eating ants.

3325 ANT-B-GON SETS
Set of four 1-oz. Dispensers———70c
3236 ANT-B-GON LIQUID
4-oz. bottle ——25c. 1 pint ——60c
½ gal., $1.50.
**For SPECIAL PESTS**

Now—Enjoy Camping Picnics and Garden Parties...Without Mosquitoes

The new "BLACK LEAF" MOSQUITO FUMER kills adult Mosquitoes and larvae quickly, efficiently and economically. Just as easy as pointing a hose. One can is enough for the average city lot (about 3 cans per acre.)

3273 BLACKLEAF MOSQUITO FUMER (wt. ½ lb.) 45c Each.

---

**KILL SQUASH BUGS SURELY! — EASILY!**

Sabadilla dust, a recently discovered insecticide, is the only sure control for squash bugs which does not retard the growth of the plants. It kills the adult bugs as well as the young, thus offering immediate protection.

3313 SABADILLA DUST 1 lb., 35c
3 lbs., $1.35; 50 lbs., $12.50.

---

3480 TRIOX Weed Killer. Poison soil and prevents weeds from growing. Use on driveways, walks, and other places where no vegetation is wanted. 1 qt., $1.00; 1 gal. can, $3.50.

---

</tbody>
</table>

A Concentrate of the alkylamine salt of 2,4-D which is soluble in water. Recommended for liquid spraying in cereal crops and for easy to kill pasture weeds.

---

3487 WEEDONE CONCENTRATE—48

Experiments show this powerful ethyl ester to be more effective at lower concentrations than other forms of 2,4-D. Soluble in water or miscible oil, gets the hard-to-kill weeds.

---

3490 WEEDUST 5% — Effective wherever wind conditions permit control of drift.

---

**Lawn PEST-GO ENDS THE FIGHT AGAINST CRAB GRASS—WHITE GRUBS AND NIGHT CRAWLERS**

The effects of Lawn PEST-GO last from 2 to 5 years. A 100 pound bag treats 1500 sq. ft. for crab grass or 2500 sq. ft. for worms and grubs only.

For complete crab grass eradication apply Lawn PEST-GO in late fall or early spring. (November 1st to April 15.)

Catalog No. 3225
25 lb. bag, $2.50; 100 lb. bag, $7.95.

CULTURAL INFORMATION and use of FLOWERS-VINES-SHRUBS-TREES

This is the key to the small and capital letters immediately following the family or variety names. These quick reference tables contain the additional information which you may need for intelligent selection and placement of the splendid assortment of planting materials offered in this catalog.

Classification and Hardiness
(Based on climatic conditions in the Salt Lake Valley and similar areas).

a—Plants that produce their flowers from seed the first year but do not survive the winter.
b—Plants that rarely produce flowers from seed until the second year and then die.
c—Plants that rarely flower from seed until the second year, but flower in season thereafter.
d—Bulbous herbaceous or tuberous rooted plants that are winter hardy without protection.
e—Bulbous, herbaceous or tuberous rooted plants that need winter protection.
f—Bulbous or tuberous rooted plants that must be lifted and given frost-proof storage during winter.
g—Vines, shrubs, or trees that are hardy everywhere. (Including higher altitudes.)
h—Vines, shrubs, or trees that are hardy in the Salt Lake Valley but need winter protection in higher altitudes and colder sections.
i—Vines, shrubs or trees that need slight winter protection or sheltered situation in Salt Lake Valley and not recommended for colder areas.

Location (Conditions Most Favorable)

j—Very adaptable—does well in full sun to part shade and any good average soil condition.
k—Likes full sun.
l—Will tolerate full shade.
m—Does well in dry situations.
n—Does well in wet situations.
o—Prefers a cool, moist situation.

General Utility or useful for:

p—Hedges.
q—Ground cover or carpeting plants
r—Cut flowers.
s—Bedding and massing.
t—Backgrounds or screening.
u—Dwarf border, edgings, rock gardens.

Special Utility—useful for:

v—Refined lawn groups.
w—Window, porch box, or urns.
x—Banks and steep slopes.
y—Parking or shade.
z—House plant.

Time and Duration of Bloom
A—Late winter and early spring.
B—Late spring and early summer.
C—Late summer and early fall.
D—Fall until winter.
E—Winter fruit or berries.
F—Continuous bloom throughout season.

Seed Planting Information
How Deep—The proper depth is very important. As a general rule, large seeds should be covered 4 to 5 times their diameter, medium and small seeds accordingly. Very fine seeds should be merely pressed into the soil, firming the soil well over them. Soil should always be kept well pulverized to receive the seed and kept thoroughly moist after seed has been planted.

G—Sow seed where plants are to grow in early spring or late fall just before the ground freezes.
H—Sow seed where plants are to grow in middle or late spring; past frost danger when plants appear above ground.
I—Sow seed for succession during spring and early summer.
J—Sow seed in early spring, mid-summer, or fall in well-prepared bed and transplant seedlings where they are to grow.
K—Sow inside in flats, pots, or boxes, in late winter or early spring, transplant to garden when frost danger is over.
L—Sow in hotbed or cold frame in early spring.
M—Seed needs chilling before proper germination can be secured. Sow, therefore, in late fall in beds or open ground.

Soil Requirements and Preferences
N—Of easiest culture for the beginner and does well in the average garden soil.
O—Tolerant of alkaline soils.
P—Prefers neutral or slightly alkaline soil.
Q—Prefers acid reacting soil.
R—Does well in poor soil.
S—Thrives best in well-enriched soil.
T—Likes heavy, clay soil.
U—Likes light, well-drained soil.

Pruning Requirements

V—Prune heavily when planted.
W—Require little pruning or thinning after planting.
X—Require heavy pruning in late winter or early spring only.
Y—Annually immediately after flowering.
Z—Shear in spring before new growth starts or in late summer just before the season growth stops.

LAWN GRASS SEEDS
CLEAN—DEPENDABLE—VIGOROUS

Ask for free leaflet—
"How to Build and Maintain A Beautiful Lawn."

LAWN MIXTURES

P.-W's "Green Lawn" Mixtures

We are especially proud of these lawn mixtures. They are composed of the pure seeds of those fine-leaved and deep-rooted permanent grasses best suited for residence lawns.

2970 VELVET GREEN—This lawn mixture is a "Must" for all home grounds in the intermountain area. It is a mixture of hardy grasses which produces a compact, smooth lawn, velvet green in color. Containing 10% Clover, it is the right mixture to provide your home with the setting it deserves.

2974 EVERGREEN—An exceptionally hardy grass mixture containing Kentucky Blue Grass, Red Top, and White Dutch Clover. This blend is adapted to sunny or partially shaded areas; it will withstand rough usage and is more drought resistant than straight Blue Grass.

2980 SHADY NOOK MIXTURE

A proven formula which includes varieties which are shade tolerant, together with varieties that do well in full sunlight. The mixture may be used with confidence on both sun and shaded areas, to produce turf of high quality, uniform, springy, and medium green in color.

2984 SPECIAL BENT MIXTURE

With this mixture you can have a putting green on your own lawn, equal to the best golf greens and there will be no trouble from dandelions and other weeds.

2988 Athletic Field Mixture

This blend of grasses consisting of Kentucky Blue Grass, Meadow Fescue, and Perennial Rye Grass is especially adapted for athletic fields, playgrounds and park areas. It is very hardy and will withstand tramping and considerable hard usage. Of nice appearance, it does not tend to become coarse and unsightly. The mixture is adapted for planting in Alkali soil, and also where ample water supply is not too certain.

FERTILIZER AND LAWN SEED SPREADERS

LAWNETTE Applies Lawn Pest-Go, Lawn Seed, or Vigoro

This spreader with its patented agitator and a small dial adjustment that instantly regulates rate of flow, insures you of proper quantity as well as more uniform plant coverage. Result—Savings in time and materials. No burning, No bare spots, a better lawn and yard all season long.

Four models—A size for every lawn, estate, park or golf course.

LAWN GRASSES

Kentucky Blue Grass
(Poa pratensis)

A deep green grass that does well on most types of soil. It continues to grow at low temperatures which keeps your lawn green in spring and autumn. Kentucky Blue is the "backbone" of fine lawn mixtures. It is aggressive and spreads rapidly, making a sod of fine texture. 2964 FANCY grade, triple cleaned.

Astoria Bent Grass
2950 (Blue Tag Certified Grade)

Properly cared for, Bent makes a beautiful lawn, discouraging weed growth. It is the true creeping type and forms a very dense sod.

2960 Creeping Red Fescue

Like Chewings Fescue, it is exceptional on sandy or gravelly soils and unexcelled in shade. The turfs of the finer strains of Red Fescue are probably the most beautiful of all lawn grasses.

LAWN CLOVER

2990 White Dutch Clover

It is the best clover to include in grass mixtures. Advantages are that it grows quickly, remains green all season, and is helpful to grasses growing with it. Gardeners who prefer heavy clover growth should include 2 oz. to each pound of grass.

LAWN SEED PRICES

Quantity prices apply only when the quantity is of a single variety.

Everblooming Raspberry
9916
INDIAN SUMMER
Bearing two, big fresh fruit crops each year, Indian Summer is the ideal Raspberry for the home garden as well as a money maker for the commercial grower. It is a vigorous grower, disease resistant and hardy—even in Canada. The large, medium to dark red fruits are mild, juicy and tender.
10 plants, $2.30; 25 plants $4.50; 100 for $15.00
The originator of Bristol Ruby may take well deserved pride in this remarkable new shrub. As he says, “Bristol Ruby is the fulfillment of a long-time need for a better Eva Rathke”. Bristol Ruby is hardier and more vigorous; it makes a shapely, thrifty, plant with attractive rich green foliage. The flowers are soft ruby-red shading to garnet crimson; a very pleasing shade. Unusual hardiness makes Bristol Ruby one of the most dependable flowering shrubs. Its rich-toned flowers appear every summer and it often continues to bloom on into Fall.

Price: 2-3’ shrubs, each $1.50; 3 for $4.00
